# Vnomic Snapshot-Based Backup & Recovery Solution

## Backup and Recovery of Large SAP Systems in Minutes not Days

In today's fast-paced business environment, minimizing downtime is crucial. Vnomic' s solution is uniquely engineered to offer rapid recovery of large SAP database systems. Leveraging cutting-edge snap-based technology, our solution ensures that even the most extensive SAP systems can be backed-up and restored in minutes, not days.

This capability is vital for businesses that rely on SAP systems for their critical operations, providing peace of mind that in the event of a system failure or data corruption, recovery will be swift and reliable, keeping business disruptions to an absolute minimum. Through intricate orchestration, Vnomic not only snapshot your database but also ensure it's in an application-consistent state before and after the process, maximizing reliability. Vnomic then moves the database to the most cost-effective storage solution to minimize cost.

# Core Features

- **Application Consistent Backup in Minutes not Days**
Leveraging cutting-edge snap-based technology, our solution ensures that even the most extensive SAP systems can be backed-up in minutes not days and it transition the system to an application-consistent state, ensuring data integrity during the snapshot.

- **SAP system Recovery in Minutes not Days**: Leveraging cutting-edge snap-based technology, our solution ensures that even the most extensive SAP systems can be restored in minutes, not days

- **Cost-optimized Storage**: Efficiently backup ANF volumes from high-priority workloads to our economically viable blob storage, ensuring budgetary alignment without compromising security.

- **Dedicated Data Protection**: Each database and associated shared storage volume group are accorded their own dedicated backup storage account, minimizing potential data interference.

- **Bandwidth Assurance**: Engineered to maintain data flow integrity, we guarantee sufficient bandwidth for the unhindered transfer of your critical data to meet the timeline.

- **Real-time Monitoring & Alerts**: Stay abreast of your data's safety. Immediate notifications for any irregularities in backup orchestration.

- **Advanced Orchestration**: Employing resilient Platform-as-a-Service components, our backup orchestration stands resilient against potential pitfalls.

- **Integrated Analytics**: Incorporating Analytics, we ensure you're consistently informed on backup statuses and alerted to any anomalies.

- **Comprehensive DR Solutions**: Choose from our robust DR options, whether it's leveraging GRS of local blob storage or ANF CRR with remote blob storage, ensuring data availability even in contingencies.

## Technical Insight:

At Vnomic, we prioritize a holistic approach to data protection. Our solution encapsulates a well-engineered deployment of cloud components and services. This ecosystem ensures a formidable data snapshot capability and fluid data movement, pivotal for migrating snapshots to blob storage.

## For Disaster Recovery

Our infrastructure supports cross-region backups, ensuring your data's security and accessibility.

## Choose Vnomic: Engineered Solution for SAP system Backup and Recovery in minutes!

Engage with a solution that embodies technical sophistication while ensuring your data's unwavering safety. Trust in Vnomic's expertise.ust in Vnomic's expertise.
