

AZURE CLOUD READINESS ASSESSMENT FROM VOHKUS

As Cloud adoption accelerates, so does the choice of deployment models – Public, Hybrid or Private Clouds, Multi or Distributed Cloud, Hyper Converged, Software Defined, Serverless, Application Containers - all driving opportunity and complexity.

Our Cloud adoption services follow the established 'Cloud Adoption Framework' defined by Microsoft and begins with the Cloud Readiness Assessment.

The Azure Cloud Readiness Assessment is a structured engagement, managed via our Project Management Office and delivered by senior Microsoft Cloud Architect, leveraging proven toolkits to ensure an accurate and targeted assessment of Data Centre environments with consistent experiences.

The Service has been designed to help businesses develop a comprehensive Cloud strategy, underpinned with a detailed business justification, supported by clear expectations and goals for Return on Investment.

Through analysis of your IT environment, including applications, infrastructure, and data, our specialists will deliver an informed review of your environment, supporting the development of a detailed cloud strategy and roadmap, identifying the best way to migrate to cloud or modernise IT assets in the cloud for optimal realisation of business value.

Service Delivery

- ▶ **Tool based discovery of Data Centre estate – 70% faster**
- ▶ **Stakeholder Interviews through scheduled meetings for validating the discovered data**
- ▶ **Analysis of datapoints by experienced & certified Microsoft Cloud Architects**
- ▶ **Preparation of detailed assessment report with right recommendations for cloud adoption**
- ▶ **Structured engagement, managed via our Project Management Office (PMO) with blended global delivery model consisting of onsite & offshore Cloud Architects, Engineers & Project Manager**
