Voiceback Analytics Pvt. Ltd.

Customized Power BI Reports and Dashboards : We create customized power BI reports and dashboards for your organization. We will model the complicated business requirements and create easy to use reports and dashboards. We will install gateways and integrate data flow from your reporting servers to ensure real time reporting for your teams. We integrate these into native apps using Azure or Premium Capacity enabling data visualizations for your operating teams at their mobiles or desktops.

Dynamic Promotions Manager :- We use data analytics & our interfaced SMS & E-mail delivery engines to give Customised Promotions in offline brick & mortar store. The dynamic promotion engine works in Real Time and in stores, it provides following capabilities to an offline brick and mortar store.

- Ability to know that a customer is inside the store

If you have a Small & Medium business, the biggest question is how does the world change in the aftermath of this COVID crisis. In this article, I discuss the big shifts which could happen and how best to prepare for them?

There is adequate reason to believe that it will could be a long drawn battle of a year or more till a vaccine emerges or significant proportion of population get infected and get the "herd" immunity. IMF estimates that the global economy would probably shrink by 3% during 2020, marking it to be the biggest downturn since the great depression of the 1930s. The forecasts for India are equally disheartening; a host of other international agencies have cut India's growth forecast to be in the range of 1.5% to 2.8% - probably the slowest in past 30 years.

Three parts of the Sentiment which needs to be measured are

1) Consumer Anxiety Index

The proportion of consumers who are very worried are less likely to step out for what they consider less critical. Therefore, we need to assess anxiety quotient for the target audience and track the proportion of very worried, somewhat worried and not worried. The impact of anxiety on consumer behaviour, however, is not a standalone variable but interacts with category criticality. The behaviour with respect to a category considered critical may not get affected despite extreme anxiety and on the other hand behaviour with respect to a category considered non-critical would get severely affected at a moderate anxiety level.

2) Category Disposition Index

Category disposition index is a mean of 2 distinct uncorrelated aspects :-

campaigns

TARGETTED PROMOTIONS

1:14 / 1:33

This video thumbnail features a red background. At the top, it says 'CREATE CUSTOMISED PROMOTIONS'. Below that, the word 'Better' is written in a large, white, sans-serif font, with 'campaigns' underneath it. To the right of the text, there are two rows of stylized human icons: the top row has five icons (three white, two black) and the bottom row has five icons (three white, two black). To the right of the icons is a white bar chart with five bars of increasing height. At the bottom left, it says 'TARGETTED PROMOTIONS'. At the bottom, there is a video player control bar with a play button, a progress bar showing 1:14 / 1:33, and several icons for settings, full screen, and other video controls.

FEEDBACK LINK SENT TO A PHONE

SMS

1:25 / 2:08

This video thumbnail has a green background. At the top, it says 'FEEDBACK LINK SENT TO A PHONE'. In the center, there is a smartphone displaying a survey interface. To the left of the phone is an orange square icon with a white telephone handset. To the right of the phone is a blue speech bubble icon with the letters 'SMS' in white. At the bottom, there is a video player control bar with a play button, a progress bar showing 1:25 / 2:08, and several icons for settings, full screen, and other video controls.

Voiceback Analytics

Data Analytics for
your future

0:02 / 1:31

This video thumbnail features a blue background with a cityscape. In the foreground, a person wearing a red raincoat and a red cap is talking on a mobile phone. In the top right corner, there is the Voiceback Analytics logo. Below the logo, the text 'Data Analytics for your future' is written in a large, white, sans-serif font. At the bottom, there is a video player control bar with a play button, a progress bar showing 0:02 / 1:31, and several icons for settings, full screen, and other video controls.

- Rake charts - Key positives and negatives
- Impact analysis – for interventions

Identifying elements leading to sentiment scores – positives / negative

It was observed that largely positives are driven by the interaction they have with the sales staff. Wherever the interaction was good, overall feedback in those stores were positive.

Key is helpful sales staff, who are friendly, attentive and knowledgeable.

Apart from these making customers comfortable while buying the product and professional attitude also seems to have influenced positive sentiment towards the brand.

Key Words - Word Cloud

IMPACT ANALYSIS

Sentiment density time map

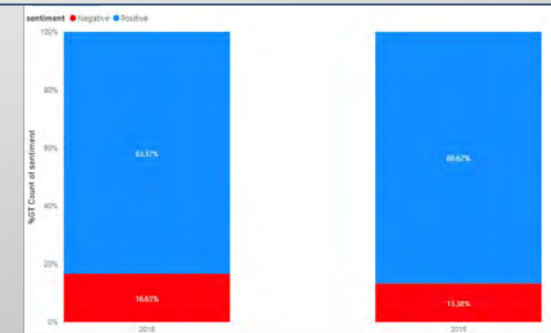

Intervention in January 2019

As can be observed, consumer sentiment has seen a shift post intervention in 2019 towards the positive. The average sentiment gradually increased and then stabilized over the year.

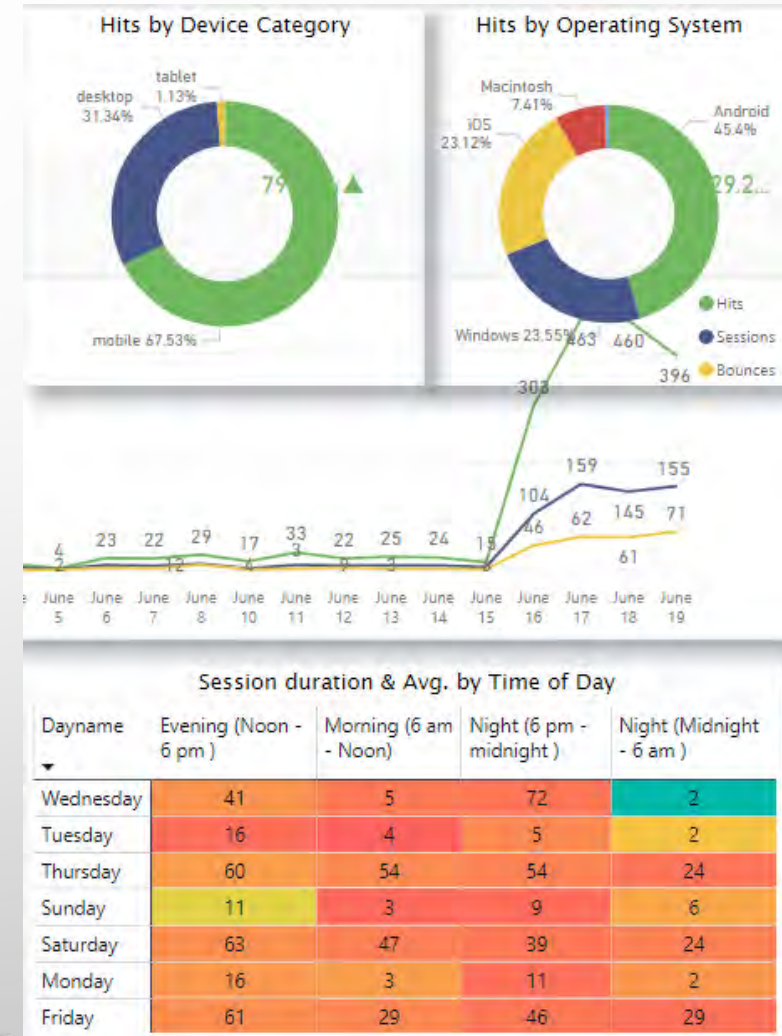

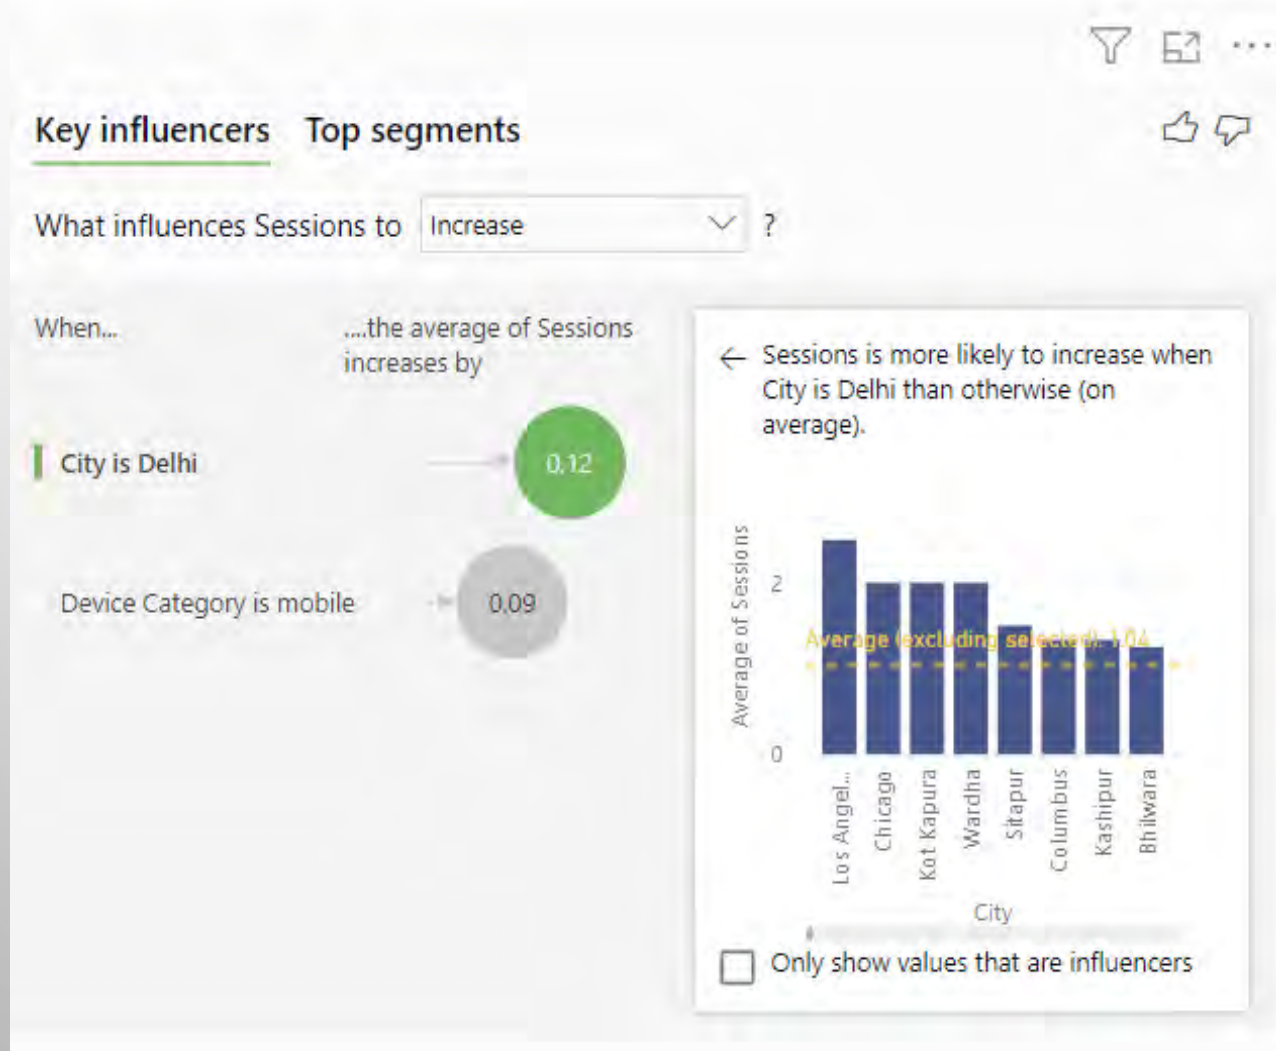

As can be observed, consumer sentiment has seen a shift post intervention in 2019 towards the positive. The average sentiment gradually increased and then stabilized over the year.

This can further be deep dived into understand at store level if required to assess which store has seen better correction.
