/api/v1/convert

Convert an array of JSON objects into CSV format. The API requires an API key to be passed in the Authorization header.

Example Header: Authorization: YOUR_API_KEY

Example Payload:

```
[
  {
    "id": 1,
    "name": "John Doe",
    "email": "john.doe@example.com",
    "age": 28,
    "address": {
      "street": "123 Main St",
      "city": "New York",
      "zip": "10001"
    },
    "isActive": true
  },
  {
    "id": 2
```

Frequently Asked Questions

Find answers to common questions about our JSON2CSV API.

What data formats can I convert with the JSON2CSV API?

Our JSON2CSV API supports JSON conversion to CSV and Excel. You can easily integrate the API into your applications and workflows to streamline your data conversion needs.

How fast is the JSON2CSV API?

Our API is designed for lightning-fast data conversion. We use advanced processing techniques to ensure your JSON data is converted to CSV or other formats quickly, even for large datasets.

Privacy Policy

At JSON2CSV, we are committed to protecting your privacy. This privacy policy outlines how we collect, use, and safeguard your personal information.

Information Collection

We collect certain personal information from you, such as your name and email address, when you sign up for our services or make a purchase. We may also collect information about your usage of our API, such as the number of API calls you make and the types of data you convert.
