

Clarity. Control.
Real results in AI & Automation.

AI & Intelligent Automation Envisioning Workshop

VOPS delivers a structured executive workshop designed to help organizations identify, prioritize, and unlock high-impact AI and automation opportunities across their operations.

Through a collaborative and business-led approach, we align stakeholders on a clear vision for intelligent operations, leveraging Microsoft technologies such as Power Platform, Azure AI, and Copilot.

This workshop is designed to move organizations from curiosity to clarity, providing a practical roadmap for implementation.

Activities Include:

- Current state discovery across processes, systems, and data
- Identification of AI and automation opportunities
- Mapping use cases to Microsoft ecosystem (Copilot, Power Platform, Azure)
- Prioritization of high-value use cases (ROI + feasibility)
- Definition of future-state intelligent operating model
- Executive roadmap and next-step recommendations

VOPS: Empowers organizations to thrive in the digital age through intelligent automation and AI-driven innovation, helping harness the power of the Microsoft ecosystem to streamline operations, reduce costs, and accelerate innovation.

Our holistic approach combines governance, scalability, and business alignment with cutting-edge AI capabilities to deliver measurable outcomes.
