

# • Passwordless

## Remove passwords

Allow you to replace your passwords with a more secure and unlockable way using a PIN code, biometric information, a smartphone or a physical security key.

## Gains

- Replace passwords with a more secure and easier to remember way
- Base the trust relationship on hardware like a smart card
- Eliminate shared secrets like passwords
- Optimize the user experience during On-premise/Cloud authentication
- Remove the ability to log in with a password on desktops

## Content of the offer

- Definition of usage scenarios
- Elaboration of the best implementation strategy
- Installation of solutions and validation
- Knowledge transfer
