

• Secure Your Identities & Access

IAM + SSO + MFA + Self Service

The perfect combination to secure your On-premise and Cloud identities and access while providing comfort and flexibility to users and reducing IT support costs.

Gains

- Uniquely and securely authenticate users across all applications
- Manage and monitor On-Premise and Cloud identities and access
- Synchronize your On-Premise and Cloud environments
- Reduce your DMZ content and IT support requests
- Provide access to partners or customers outside your organization

Content of the offer

- Considering the existing situation, the challenges and the strategy
- Recommendation, presentation and articulation of solutions according to the need
- Development and implementation of identity and access management and monitoring rules
