Secure Your Modern Workplace

Secure the way you work from home

In the current situation, this offering allows you to optimally improve security by eliminating perimeter barriers. Take a proactive approach to security by identifying and eliminating advanced threats before data is compromised.

Gains

- Reduce attack surfaces and address end-to-end security

- Have a battery of coherent and efficient protection measures (EDR, 0-days protection,…)

- Prevent, detect, react and alert in case of abnormal behavior or attacks such as "phishing", "malware" or "ransomware

Content of the offer

- Definition of the security strategy for your environment

- Design and deployment of security measures

- Supervision and measurement of security gains
