

• Secure Your Privileged Identities

Secure your high-privileged identities

Allow you to manage, control and monitor access to your organization's important resources.

Gains

- Mitigate the risk of excessive access authorizations on targeted resources
- Provide "just-in-time" privileged access
- Require approval to activate privileged roles
- Apply multi-factor authentication to activate privileged roles
- Receive notifications when privileged roles are activated
- Perform recertification or access review
- Audit access request history
- Implement dedicated administration workstation (PAW)

Content of the offer

- Define the security to be applied to Azure privileged identities
- Development of two custom roles
- Installation of the solution and validation

« Secure Your Privileged Identities »

Delivrables

-  Design and operation files
-  Azure PIM, PAW, Azure Identity Protection
