

# PROJECT STRONGHOLD

Solution by VST ECS

Powered by Microsoft Sentinel, Defender & Security Copilot

Let's talk! Scan me

## Unified SecOps and unified Platform

### Unify SecOps-defend at scale

Centralize security data in a Microsoft Sentinel cloud-native data lake. Gain full attack-path context to help security teams see the bigger picture, coordinate faster across environments, and respond decisively at scale—with AI-powered SecOps.

### Stay ahead of threats with autonomous prevention

Use intelligence and automation to anticipate attack paths, apply adaptive policies, and reduce exposure—stopping threats before they strike.

### Put agents to work for your team

Empower SOC with embedded AI agents to automate tasks, hunt continuously, and orchestrate workflows at machine speed—without adding headcount.

### Generate AI: greater productivity

Empower analysts with embedded Copilot capabilities

## It's a Solution!

**Implementation  
Services  
with Support by  
VST ECS**
