

PROJECT SUPERNOVA

Solution by VST ECS Powered by Azure Virtual Machines
(Infrastructure-As-A-Service)

Let's talk! Scan Me.

Why Project Supernova?

Enable secure and productive remote work on any device

Windows Virtual Desktop provides full Windows 10 and Windows Server desktop and application virtualization on personal devices from any internet-connected location.

Reduce costs of licensing and infrastructure

Use eligible Windows or Microsoft 365 licenses to access Windows Virtual Desktop and pay only for what you use.

Protect against outages to stay productive

Help keep your team running during outages by leveraging built-in Azure Site Recovery and Azure Backup technologies.

Simplify IT management

Windows Virtual Desktop manages the virtual desktop infrastructure (VDI) for you, so you can focus on users, apps, and OS images instead of hardware inventory and maintenance.

Keep application and user data secure

Reduce vulnerabilities and help keep your virtual desktops secure by leveraging reverse connections and security solutions like Azure Firewall, Azure Sentinel, and Azure Security Center.

It's a Solution!
