## SafeCity Public Space Cameras, powered by Vumacam

**Access Vumacam's SafeCity camera network enabled by Proof, to deliver a world-class public safety service in your region. Take your video control room to the next level with Proof.**

The SafeCity camera network is designed for flexible access and optimised to deliver both overview and LPR video feeds directly to your CCTV control room through Proof.

Proof is a market-leading, cloud-enabled, video-centric PSIM. Optimise your CCTV control room and ensure you get the best return for your investment by removing the "noise" generated by traditional video monitoring products. Proof is a true "black-screen" software solution that leverages the best AI and ML to ensure that your control room operators only take action against alerts processed by advanced video analytics.

Proof is able to ingest almost any video feed as well as integrations for alerting IoT devices. Providing control room managers and operators a true situational overview of the space they secure. Accredited security providers with access to public CCTV networks, Proof enables rapid response via an auto-dispatch feature set allowing them to secure public spaces.

Proof offers the following essential CCTV monitoring functions:

- **Alert management** via a prioritised alert stack
- Highly customisable **standard operating procedures** (SOP)
- **Live** and **recorded** video viewing
- **Vehicle of interest lists** with access to public and private databases
- **Event and situation** management
- **Auto dispatch** via 3<sup>rd</sup> party or your own response provider
- **Telegram integration**
- **Reporting** and analytics

Pricing may vary depending on the terms of the contract and any specific configurations applied according to customer requirements.
