

Digitalisation of business travel

 Vyootrip

About Vyootrip

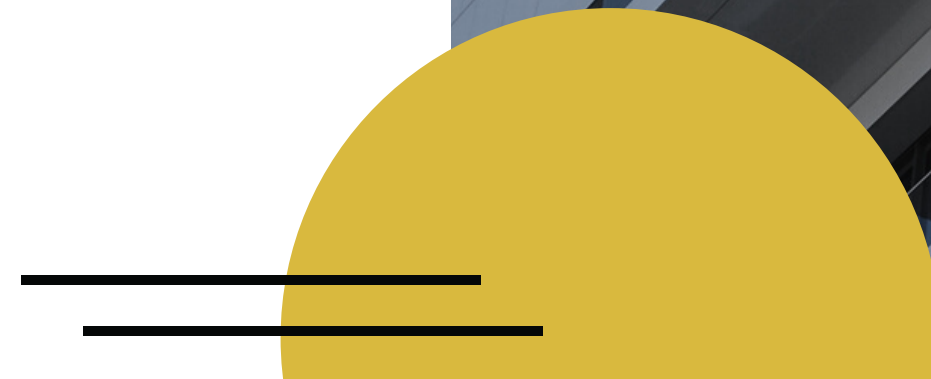

WHAT ARE WE?

Vyootrip is a partner for your travel agency. we offer you the possibility of improving your corporate travel service.

In this way, if you have corporate travel clients or companies, you will be able to offer a more digital and efficient service.

If you do not yet have corporate travel clients, with vyootrip you can be more competitive and offer a first level corporate travel management service.

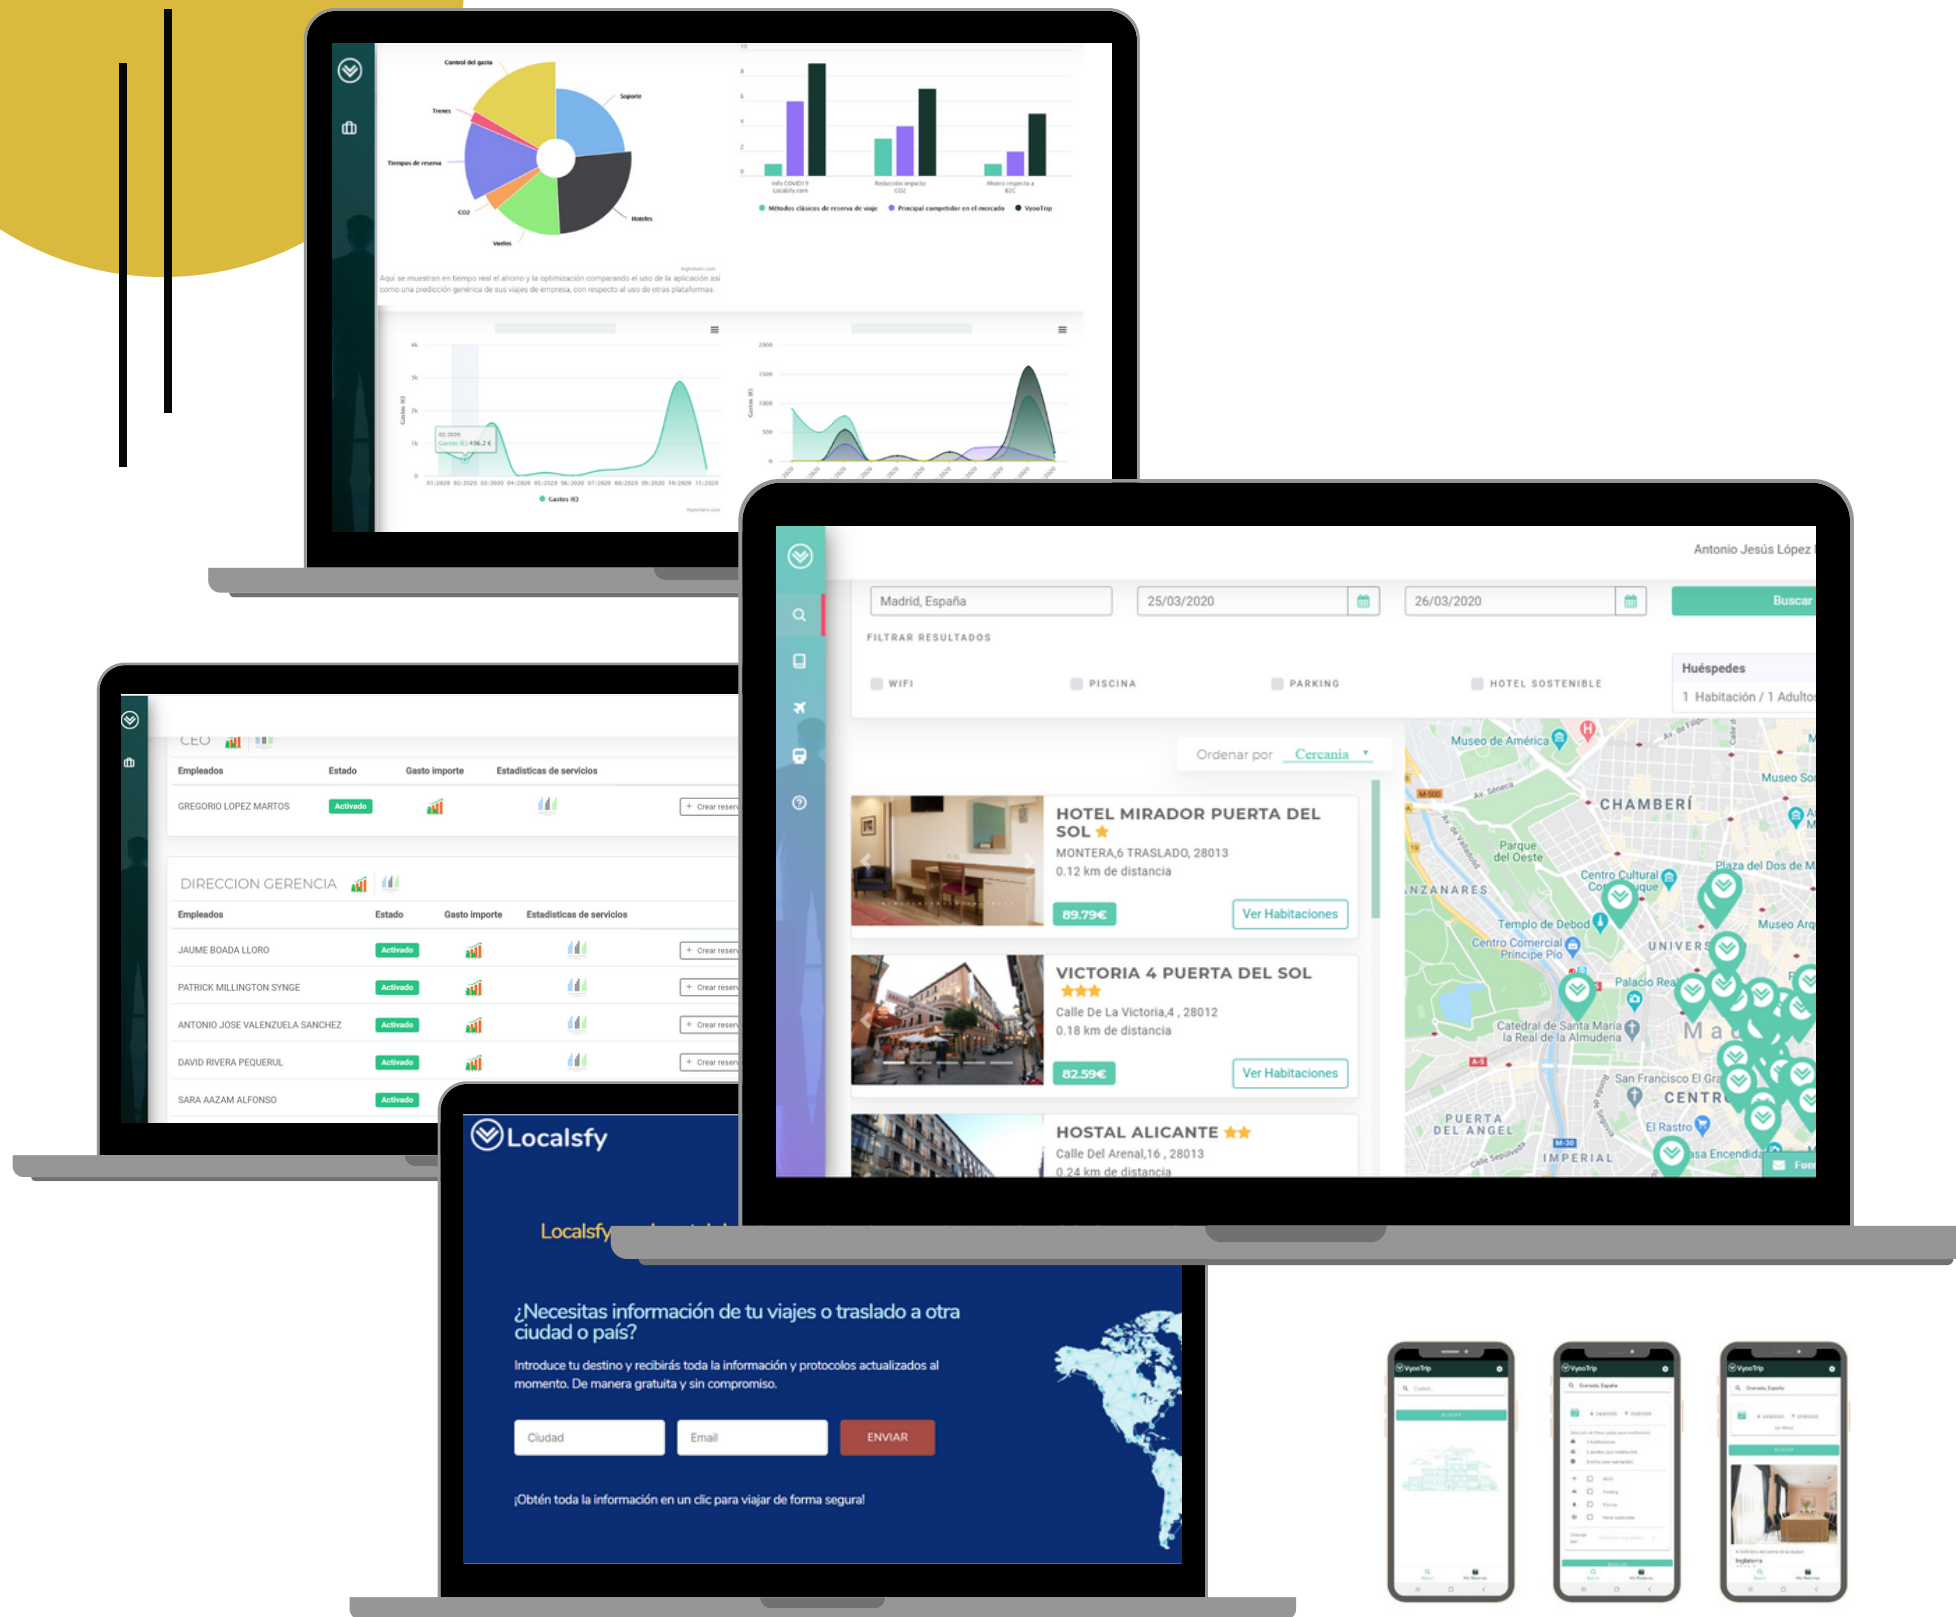

Through technology we focus on digitising all management processes in travel agencies.

EMPOWER YOUR CUSTOMER

We design our software to your needs. With Vyootrip you can provide your client with a solution where they can manage all their corporate travel.

It allows your client to make accommodation and transport reservations, as well as a travel expenses control system. All in the same portal, with all the information in real time.

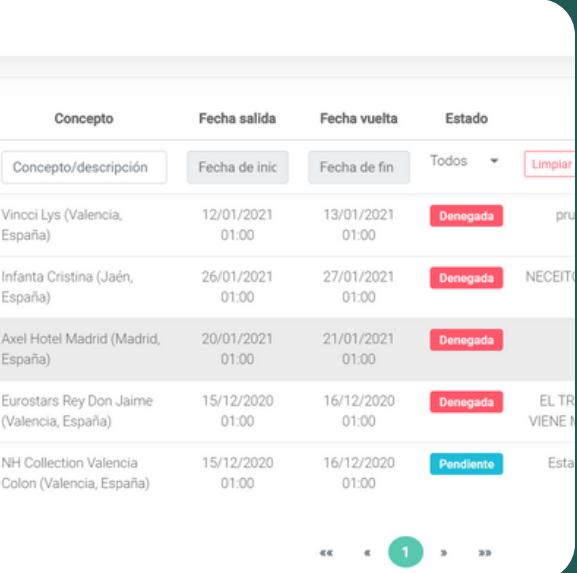

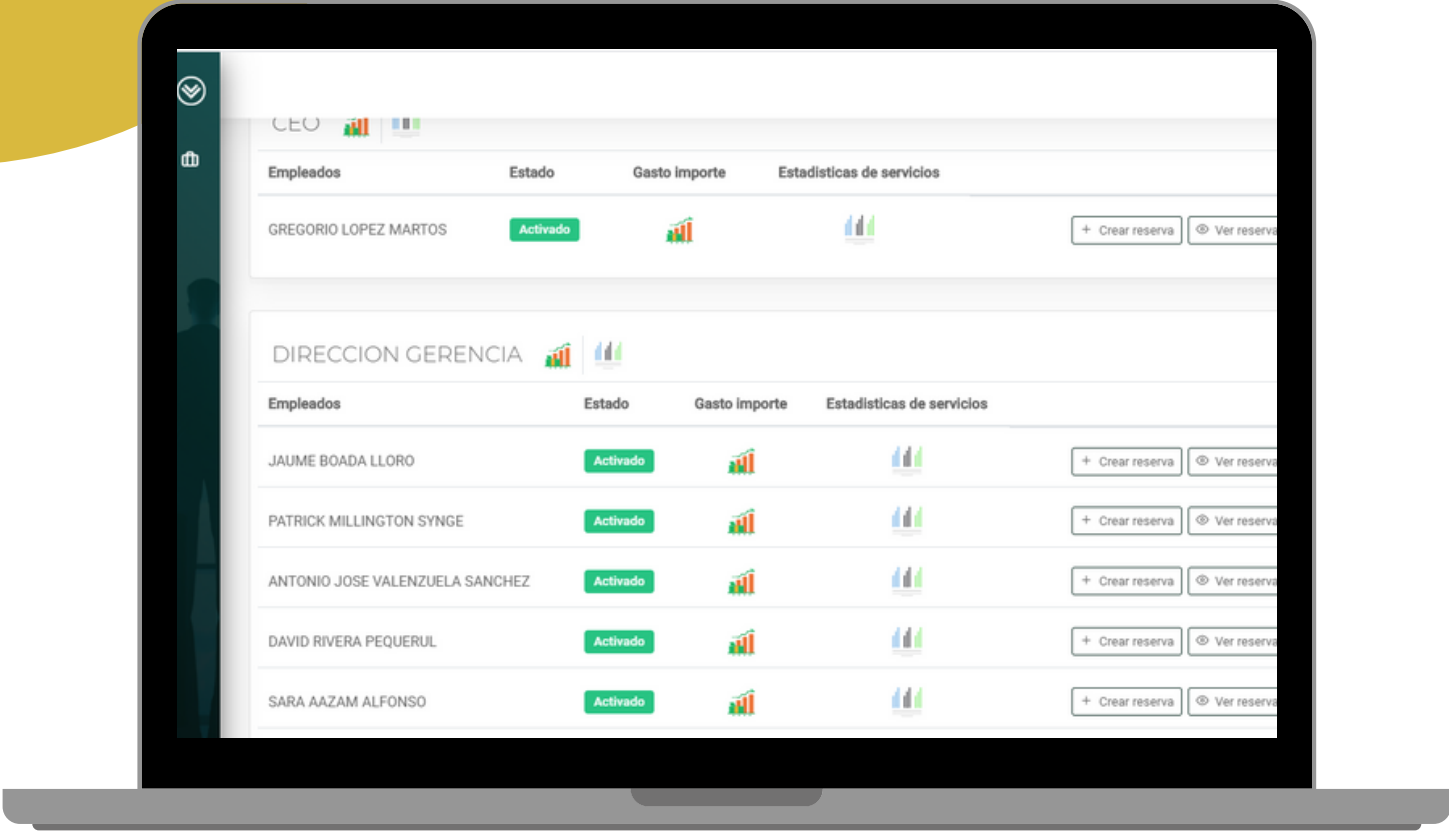

Create travel policies

create departments and roles in the organisation

Create projects and approval workflows

Admin Portal

REAL-TIME DASHBOARD

EXPENDITURE AND SERVICES STATISTICS

Measure in real time your expenses to optimise your budget and maximise your service.

Compara tus viajes versus las herramientas B2C

GET TO KNOW THE TRAVEL DATA

Get instant tickets, reports and transactions with our TRM portal.

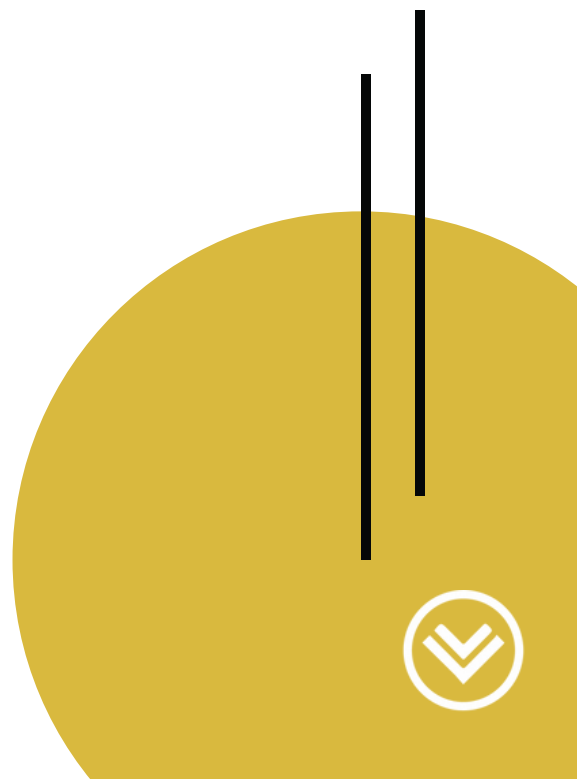

USER PORTAL YOUR JOURNEY IN HAND

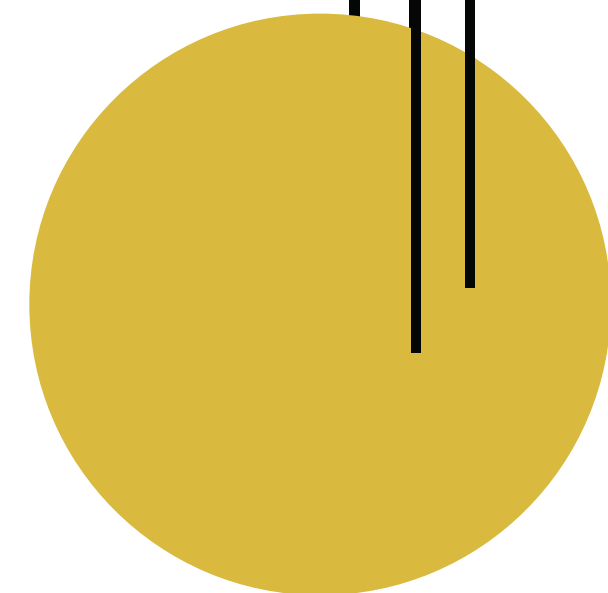

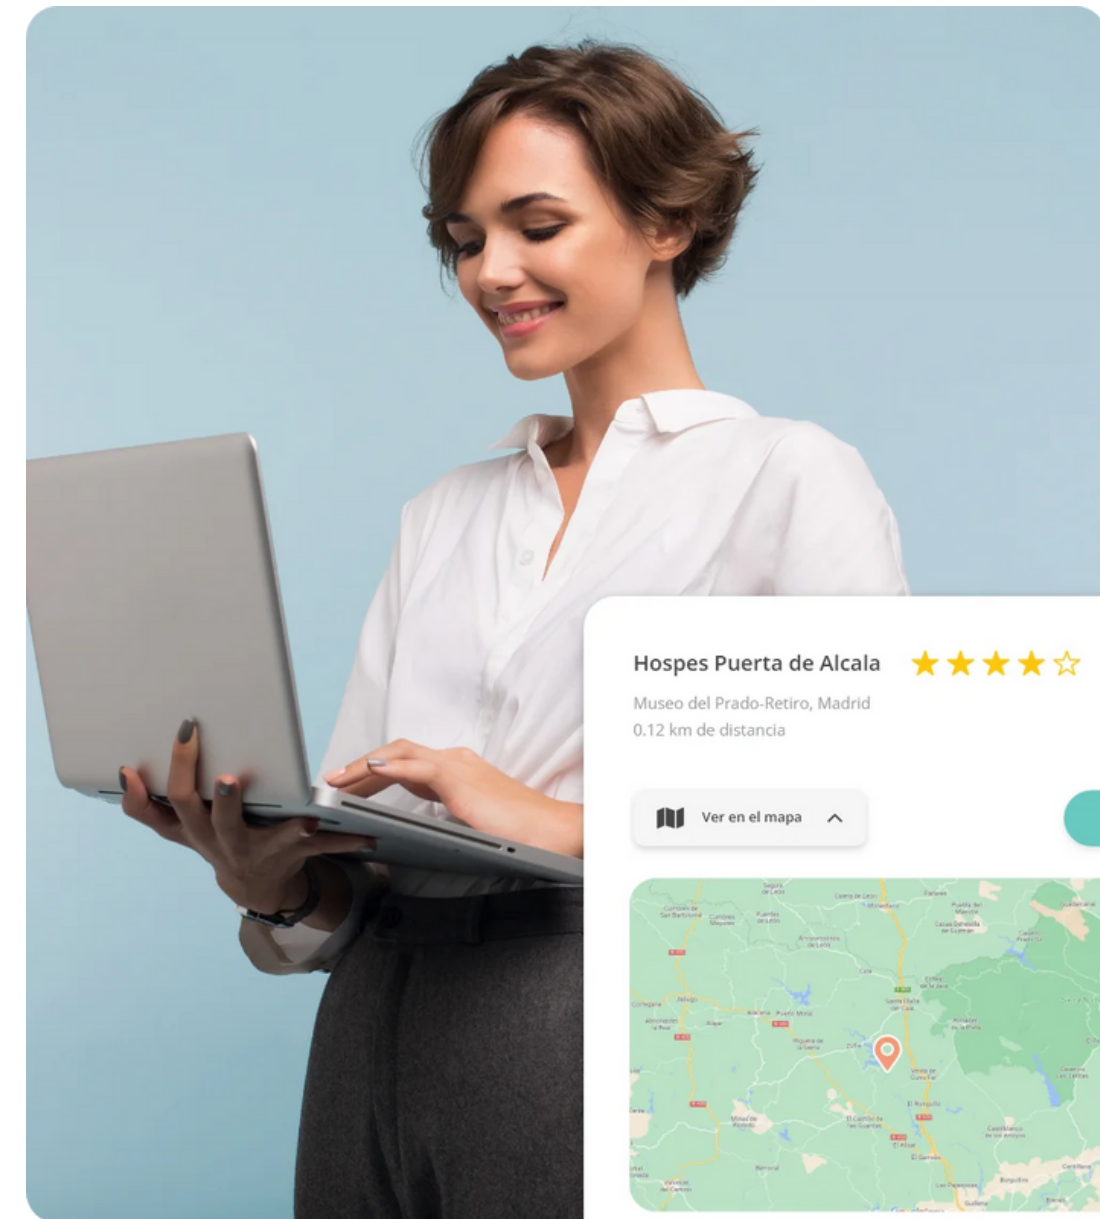

Corporate travellers will be able to book any accommodation or transport service, in compliance with the travel policy established by the company, all on the same portal.

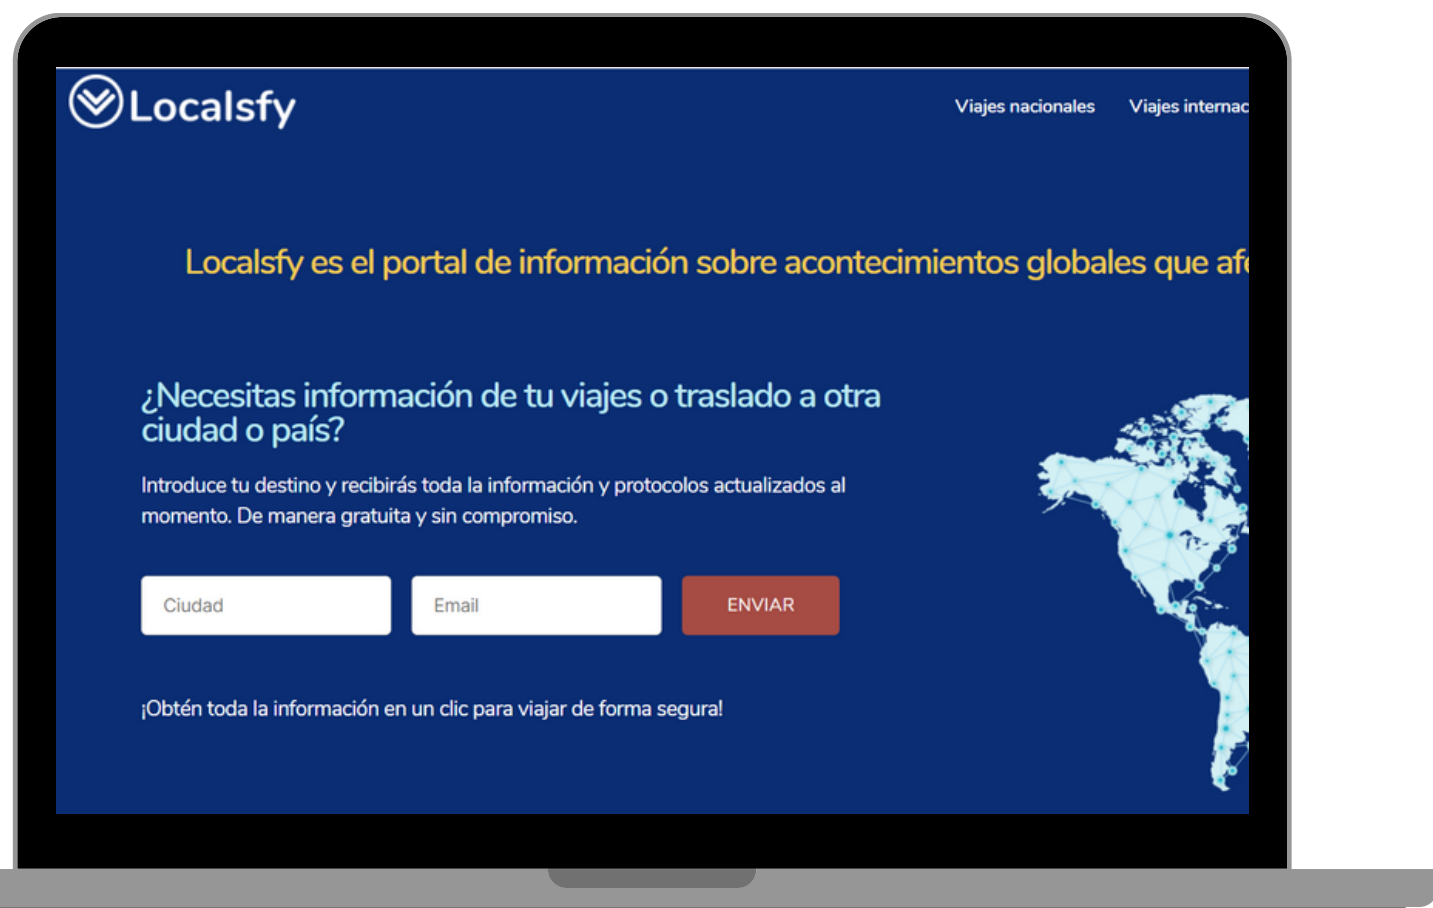

Once booked, they can access all their vouchers and bookings in real time on a multi-device platform.

ALL SUPPLIERS

We design our software to measure.
All of your organisation's roles and suppliers in a single multi-device portal, with all the information in real time at your fingertips

Localsfy is the portal for real-time information on global events affecting business travel.

We use the latest relational technology to be able to inform you of everything related to your trips in a 360 degree environment, from origin to destination and in real time directly to your mobile phone with push technology.
