AI-Enhanced Workflow automation with Power Automate

Power Automate Workflow Automation & AI Integration

Streamline your business processes with our Power Automate Workflow Automation & AI Integration services. We specialize in automating repetitive tasks, integrating disparate systems, and enhancing workflows with AI-driven capabilities. Our solutions help you achieve greater efficiency, accuracy, and productivity.

Our Offerings

- Power Automate Consulting for workflow automation
- Power Automate Design, Development & Integration (For web, mobile, MS Teams & Desktop)
- Workflow implementation & Support

Our Approach

Discovery & Requirements Analysis (1 week):

- Conduct workshops to understand your workflow processes and automation needs
- Identify key areas for automation and integration

Design & Prototyping (1 week):

- Create workflow diagrams and prototypes to visualize automation processes
- Incorporate feedback to refine the design

Development & Integration (2 weeks):

- Develop automated workflows using Power Automate
- Integrate with existing systems and data sources
- Implement AI capabilities using Power Automate Copilot

Testing & Quality Assurance (1 week):

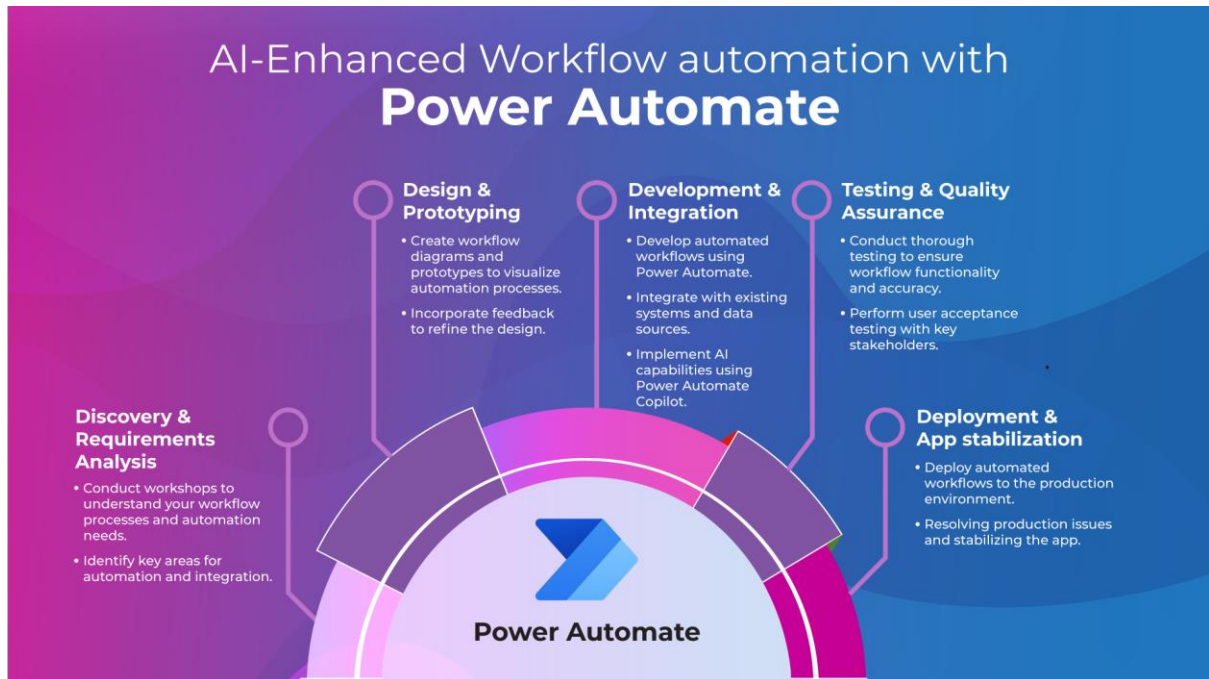

- Conduct thorough testing to ensure workflow functionality and accuracy
- Perform user acceptance testing with key stakeholders

Deployment & App stabilization (1 week):

- Deploy automated workflows to the production environment
- Resolving production issues and stabilizing the app

wai technologies

Key Deliverables

- Automated workflows tailored to your business needs
- Integration with existing systems and data sources
- Comprehensive user training and documentation
- Post-deployment support and maintenance

Benefits

- Increase efficiency by automating repetitive tasks
- Reduce manual errors and improve data accuracy
- Enhance productivity with AI-driven workflow automation
- Improve process visibility and control

wai technologies

Differentiators

- **We use Copilot** extensively for
 - Automated Workflow Creation
 - AI-Driven Decision Making
 - Natural Language processing
 - Integration with AI Models
 - Continuous Improvement and Adaptation
- **Expertise:** Certified Power Platform professionals with extensive experience
- **Customization:** Tailored automation solutions to meet specific business needs
- **Support:** Comprehensive post-deployment support and maintenance
- **Innovation:** Leverage AI capabilities with Power Automate Copilot for advanced automation

Pricing

- **\$25,000 USD**

Duration

- **5 weeks**
