

Power BI Analytics Maturity Pathway

A guided framework combining immersive training & workshops to spearhead self-service analytics

Accelerate self-service Power BI analytics outcomes

A combination of hands-on training and workshops that ensures attendees are trained to build reports on Power BI using not just sample data, but also assisted to analyze their own organizational data, with a guided framework to ensure successful outcomes.

Extend concepts in a guided manner to deliver and augment impactful Power BI reports!

Practical framework to move business users further along in the self-service journey

Learn the most useful techniques and tools to get started correctly the first time, and extend this knowledge with guided practice

- Learn concepts through Dashboard in a Day training
- Apply concepts to organizational data through a Reporting Workshop
- Check-In(s) as required to cement understanding

Dashboard in a Day

- 1-day, hands-on workshop using sample sales data
- Cover the breadth of features Power BI Desktop and Power BI Service has to offer
- Understand data modeling and reporting best practices

Reporting Workshop

- 1-day, hands-on workshop using organizational data
- Reinforces concepts covered in the Dashboard in a Day
- Pre-agreed Power BI report delivered & published

Check-In(s) as required

- 1 Check-in with business users in 3-4 weeks to review Power BI reports developed by them
- Suggest next steps towards optimizing and enhancing the reports using data modeling and reporting best practices
- More check-in(s) can be planned for as required
