

A photograph of three business professionals in an office setting. On the left, a man with glasses and a beard is gesturing with his hands while talking. In the center, a woman with short grey hair, wearing a blue blazer and a colorful patterned scarf, is smiling. On the right, a woman with curly hair is also smiling. The background shows a large window with a grid pattern. The image is partially covered by a large purple graphic element on the right side.

Copilot Adoption Services

Ensure your business benefits from a successful Microsoft 365 Copilot integration and sees demonstrable ROI

Ready to onboard your AI companion at work?

Navigate the future of work with Microsoft 365 Copilot

Microsoft 365 Copilot is designed to bring AI to everyone. From the C-suite to your Operations teams, Service Desk and HR, Copilot has the potential to reduce workloads and increase your productivity.

While it won't do the job for you, it can help to relieve the digital debt we accumulate with modern ways of working.

Now that you have taken the first step in preparing for Copilot and securing your licenses, here's how Wanstor can help you extract greatest value from the product.

Adoption Plan

Make Microsoft 365 Copilot work for you.

Wanstor's technical architects will work with your teams to understand organisational challenges and goals in preparing an adoption plan that will leverage Microsoft 365 Copilot and deliver against your business timescales and outcomes.

Communication Strategy

Onboarding employees,
updates on new features

Training Strategy

User enablement,
training guides

Feedback Loop

What works and what
does not, end user surveys,
champion insights

Measuring success

Reporting and
usage analysis

Adoption assistance

We provide you adoption toolkits and regular bulletins to help users understand the benefits of Microsoft 365 Copilot, including scenarios and use cases across your IT estate. These materials can be aligned to your organisational messaging and brand.

Prompt training

A prompt is a natural language request submitted to a language model that will receive a response. Prompts are used to request that Copilot completes a task such as creating, summarising, editing or transforming content.

Crafting effective prompts improves Copilot’s performance, meaning more efficient interaction and more relevant output.

Wanstor can provide prompt training along with detailed reporting on usage adoption across the organisation, so you can demonstrate ROI to key stakeholders.
