

# Custom Copilot Solutions

Tailored AI experiences for  
your business

# Organisations across the UK are leveraging bespoke Copilot Agents to automate tasks and unlock new levels of efficiency

**Gartner** predicts that by 2026, 30% of enterprise workflows will be automated using AI-driven agents, up from less than 5% today.

**Wanstor's** designs, develops, and deploys custom Copilot Agents tailored to your organisation's unique needs.

These intelligent agents automate repetitive tasks, improve accuracy, and deliver a seamless user experience across business functions. From HR and finance to IT support and beyond, Copilot Agents are built to integrate with your systems and evolve alongside your AI journey.

## Why organisations should adopt Copilot:

As organisations across the UK seek smarter, faster ways to work, Copilot is emerging as a transformative tool that empowers teams to unlock productivity, streamline operations, and innovate with confidence.

- + **Boost Productivity:** Automate repetitive tasks and reduce time spent on manual work.
- + **Maximise ROI:** Drive measurable outcomes through improved efficiency and reduced operational costs.
- + **Customisable to Roles:** Tailored experiences for different departments and user groups.
- + **Enhance Decision-Making:** Access real-time insights and intelligent suggestions directly within familiar tools.

# Introducing our custom Copilot solutions

**Wanstor's** Copilot Agents are purpose-built to address a wide array of organisational requirements.

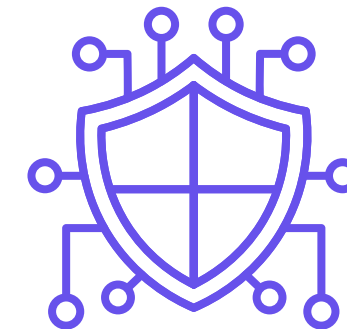

## Consultation & Design

Identify automation opportunities and define agent requirements

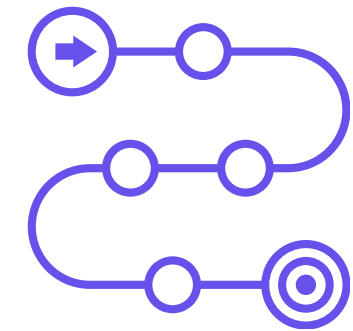

## Development & Integration

Build bespoke agents and connect them to your systems

## Training & Adoption

Equip teams with knowledge to use agents effectively

## Support & Evolution

Continuous updates and scalability as your needs grow

HR Copilot Agents can handle frequently asked HR queries by referencing your internal policies and procedures. Where a query exceeds the agent's remit, the system can automatically escalate the issue, creating a task for the HR team to review and resolve, ensuring no request is overlooked.

Beyond HR, **Wanstor** develops specialised Copilot Agents to tackle unique operational challenges within your organisation. These may include finance agents to assist with invoice queries, IT support agents for technical troubleshooting, or agents that integrate seamlessly with third-party applications and enterprise systems unlocking new opportunities for automation and process improvement within your organisation.

# Our approach

**Wanstor** provides full support throughout the implementation process.

We work with organisations to design, develop, and deploy bespoke Copilot solutions, known as Copilot Agents. These digital agents are individually crafted to automate and streamline specific tasks, enabling organisations to boost efficiency, improve accuracy, and deliver a seamless user experience across business functions.

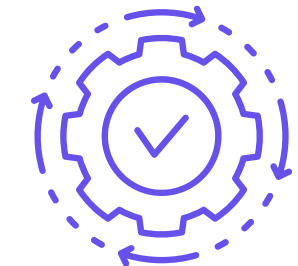

We showcase the capabilities of Copilot Agents within your organisation, allowing stakeholders to experience the benefits first-hand. From initial consultation and design, through development and deployment, our team ensures a smooth transition and minimal disruption to daily operations.

# Steps we'll take, together

## Deployment & Training

Implement agents and train users for adoption

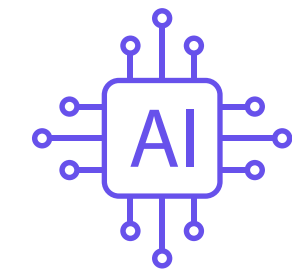

## Continuous Improvement

Monitor performance and enhance capabilities

## Discovery Workshops

Understand workflows and identify automation opportunities

## Agent Development

Build and configure bespoke Copilot Agents

We also assist with licensing, recommending the most appropriate module to suit your needs and budget.

# Why Wanstor

We work closely with you to identify areas where automation can drive efficiency and deliver measurable improvements.

Copilot Agents are designed to evolve alongside your organisation's AI journey. Whether your business is taking its first steps with retrieval-based agents focused on data and task management, or you are ready to embrace advanced autonomous agents capable of complex decision-making, Wanstor provides the expertise and guidance you need.
