

Data Warehousing made Easy

— About EasyLake:

Easy Lake is a comprehensive data warehousing solution designed to streamline your data management and analytics processes, and serve as your foundation for AI/ML initiatives. Built in collaboration with Microsoft, the world leader in data infrastructure and business intelligence, Easy Lake offers a user-friendly, scalable platform that grows with your needs.

— What we offer

Our EasyLake implementation follows a proven, systematic approach that ensures your success. We begin by setting up your infrastructure under your Azure account and conduct a thorough kickoff to align on goals, scope, and data requirements. Our team then develops a custom medallion architecture, followed by hands-on demonstration sessions covering Microsoft Fabric configuration, data definitions, and security roles. We guide you through the implementation of Bronze tables, Silver Views, and Gold Facts, providing comprehensive training and documentation along the way. Once your EasyLake environment is live, we offer flexible support and maintenance options to ensure your ongoing success.

What our customers are saying

“Capturing, storing, and using first-party data is essential to our success in this mission, and Warecorp is helping to make that possible. Their work to modernize our data practice through the EasyLake architecture is transformative.”

– Phil Ensminger, Chief Technology Officer,
Beacon Point Associates

Why Microsoft Azure?

— Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

— Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

— Build on your terms

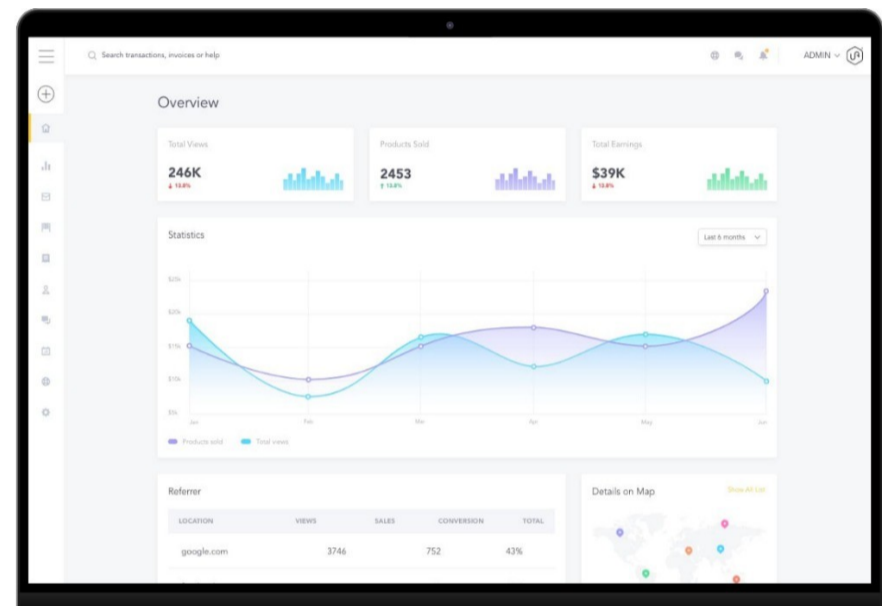

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

— Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
