

GO BEYOND HYPE. START USING COPILOT FOR MICROSOFT 365 EFFICIENTLY.

Microsoft Copilot for Microsoft 365 combines the power of large language models (LLMs) with your organization's data. And it does so smoothly and naturally, within your work flow. It turns your words into one of the most powerful productivity tools in the world.

It works alongside popular Microsoft 365 apps like Word, Excel, PowerPoint, Outlook, Teams, and more. Copilot for Microsoft 365 provides real-time smart assistance, enabling users to boost their creativity, productivity, and skills.

Why Copilot? People want them because they make them efficient:

From Microsoft's survey of users who had the opportunity to test Copilots over several months in 2023:

68 %

said that Copilot has improved the quality of their work

70 %

made Copilot more productive

77 %

said they didn't want to give up Copilot anymore

How to start in your company? Safely and efficiently, with our help:

Microsoft Copilot for Microsoft 365 can work securely with public online data and your business documents and data under Microsoft's industry-leading protection. It doesn't use your data to train the model and ensures access according to your tenant's set user permissions.

Leverage best practices to deploy Copilots in a controlled manner and teach your organization how to use them quickly and effectively. We offer a comprehensive introductory workshop, follow-up training and infrastructure preparation as a step-by-step roadmap for your future with AI.

Efficiently manage Copilot resources, infrastructure, security, and licenses with us. Get inspired for further development, build a Centre of Excellence for AI in your organization with us.

**We offer a step-by-step plan that goes beyond AI hype.
Join us on a journey.**

JOIN US ON A JOURNEY. START USING THE POWER OF COPILOTS TO THE FULLEST, EFFICIENTLY AND SAFELY.

1 Get ready for Copilot. Inspirational workshop/webinar

60-minute introduction to basic Microsoft Copilots for Bing and Microsoft office applications (Teams, Excel, Outlook, Power Point), inspiring scenarios for their practical use.

2 AI Assessment. Practical workshop. Creating a plan.

8-hour workshop – overview of Copilot and Microsoft AI tools, usage scenarios, security and controlled access, legislative framework, definition of usage scenarios and possibilities of optimizing work specifically in your organization. The output is a plan for your business.

3 AI readiness and implementation

We follow a step-by-step plan based on the workshop and the specific needs of your company. Licensing consulting, tenant settings, security, data sources, document storage.

Technical preparation of the organization for the use of AI.

4 Adoption. Let's learn how to start and keep learning

Leverage best practices to deploy copilots in a controlled manner and teach your organization how to use them quickly and effectively. Training of users, administrators, methodology and parameters (KPI) of adoption. Follow-up training, monitoring the success of adoption, development opportunities and sustainability of the technology in your organization.

5 Operational support, further development.

Manage resources, infrastructure, Copilot security and licenses. Get inspired in regular workshops for further development, build your own AI in Copilot Studio, build with us Centre of Excellence for AI in your organization.
