POWER PLATFORM HACKATHON

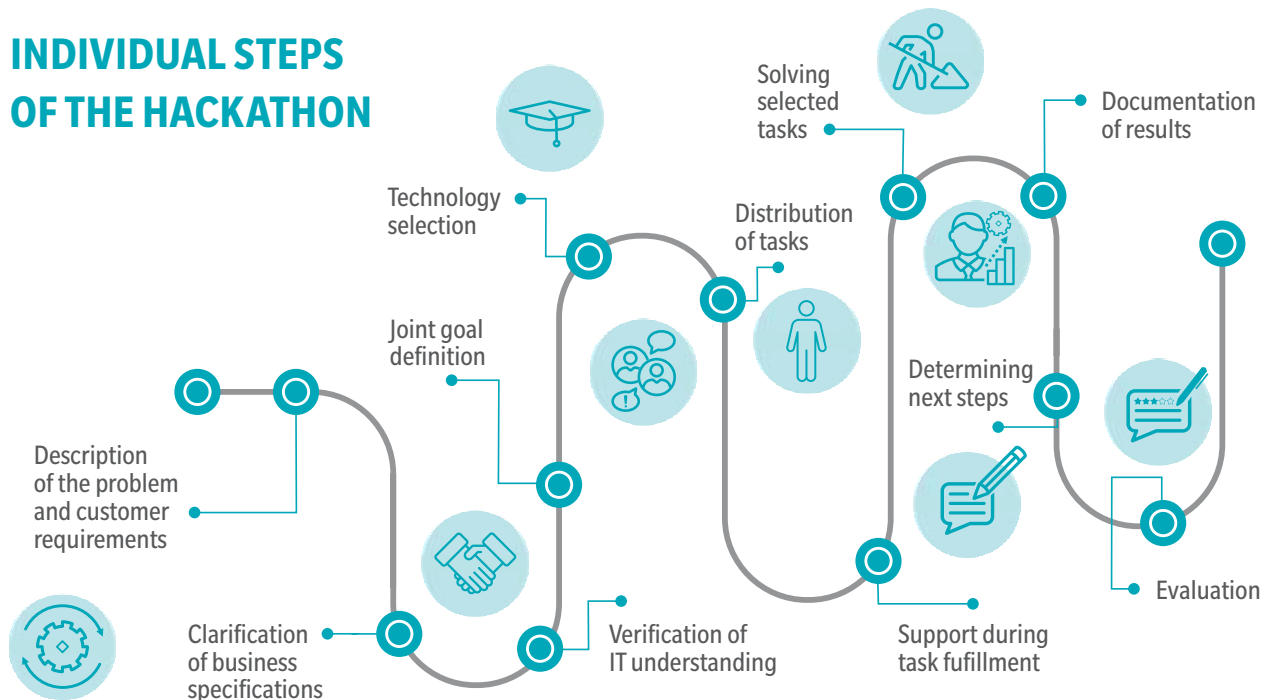

WORKSHOP

The goal of a hackathon is to motivate a group of bright minds to jointly solve a specific problem with the help of Power Platform technology. You will learn to use the Power Platform for other application and processes as well.

Don't worry, we will help you. We run the Hackathon and help with the selection of suitable technology or give professional advice to individual team members.

INDIVIDUAL STEPS OF THE HACKATHON

WHAT TO EXPECT:

- Introduction of the selected problem to be solved
- Creating clarity in the assignment specification, so that everyone understands the goal
- Analysis of the solution, evaluation of whether it makes sense to address the problem, and at the same time suggestions for further action
- Division of roles within individual teams
- Creating a list of subtasks (procedures) so that the individual steps lead to solution of the specified problem
- Coding, designing
- Presentation of results

WHO IT IS FOR

At the workshop we cooperate not only with IT experts and developers from your company, but also their business colleagues. During the event we want to combine the IT perspective with the expectation of the end-user and thus find the idea solution to the selected problem.

WHAT YOU GET

Find out all the possibilities of Power Platform hands-on. You will learn how to combine individual components to solve the selected problem. You will gain not only new knowledge, but also a concrete functional solution to the problem or parts of it (depending on the topic complexity, specific knowledge requirements, and the amount of time available).

HOW MUCH TIME DO YOU NEED?

Depending on the complexity of the chosen problem and the team composition, we will suggest the required duration. Our experts are present at all times and lead the workshop.

Standard duration: 1–3 days (9am to 7pm)

WHERE WILL IT BE/WHERE WILL IT TAKE PLACE

At your premises, provided you have sufficient space with internet access available. However, we can also arrange for an alternative location.

HOW MUCH WILL IT COST

The price is defined by the total duration of the hackathon and the number of our participating experts. For groups of 8 or more participants we recommend 2 of our experts to provide the necessary assistance.

1.200 EUR for 1 day and 1 expert
