**DRIVING DIGITAL EXCELLENCE WITH
SCALABLE SAAS SOLUTIONS!**

Introducing Task Manager

The All-in-One Task Management & Collaboration Platform

Task Manager is Webify.ai's flagship AI-powered platform designed to simplify project planning, streamline team collaboration, and enhance task tracking across departments. Built on Microsoft Azure, it ensures high performance, reliability, and scalability. Whether you're managing day-to-day tasks or overseeing enterprise-wide initiatives, Task Manager adapts to your workflow and drives meaningful outcomes.

From intuitive dashboards to powerful automation, Task Manager offers everything modern teams need to stay productive. Real-time notifications, role-based access, analytics, and integrated communication tools help unify your teams and reduce miscommunication. This makes Task Manager a single source of truth for projects, deadlines, and accountability across all levels of an organization.

Built to Solve Real Business Problems

Best Project Management Tool
for Teams Collaboration

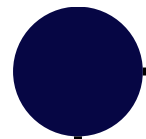

All-in-One Task Tracker with Time
Management for Every Industry

Agile Task Management for Better
Team Building

Task Manager is not just versatile; it's designed with deep understanding of diverse workflows. From IT ticket tracking to HR onboarding, and from marketing project timelines to financial audits—Task Manager fits seamlessly into your business operations.

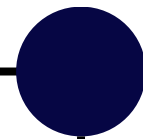

Designed for Every Role

Admins, Department Heads & Employees

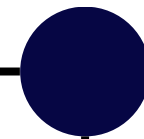

Admins:

Admins have complete control over the platform. They can create, assign, and monitor tasks, manage teams and departments, configure system settings, and view performance analytics across the organization. Admins also handle access roles, approve deadline changes, and maintain an overview of all activities for high-level decision-making.

HODs:

Head of Departments (HODs) lead teams effectively using Task Manager. They can assign tasks to team members or themselves, create groups for better organization, and review performance within their department. With powerful analytics, role-specific notifications, and recurring task scheduling, HODs maintain clarity and accountability in daily operations.

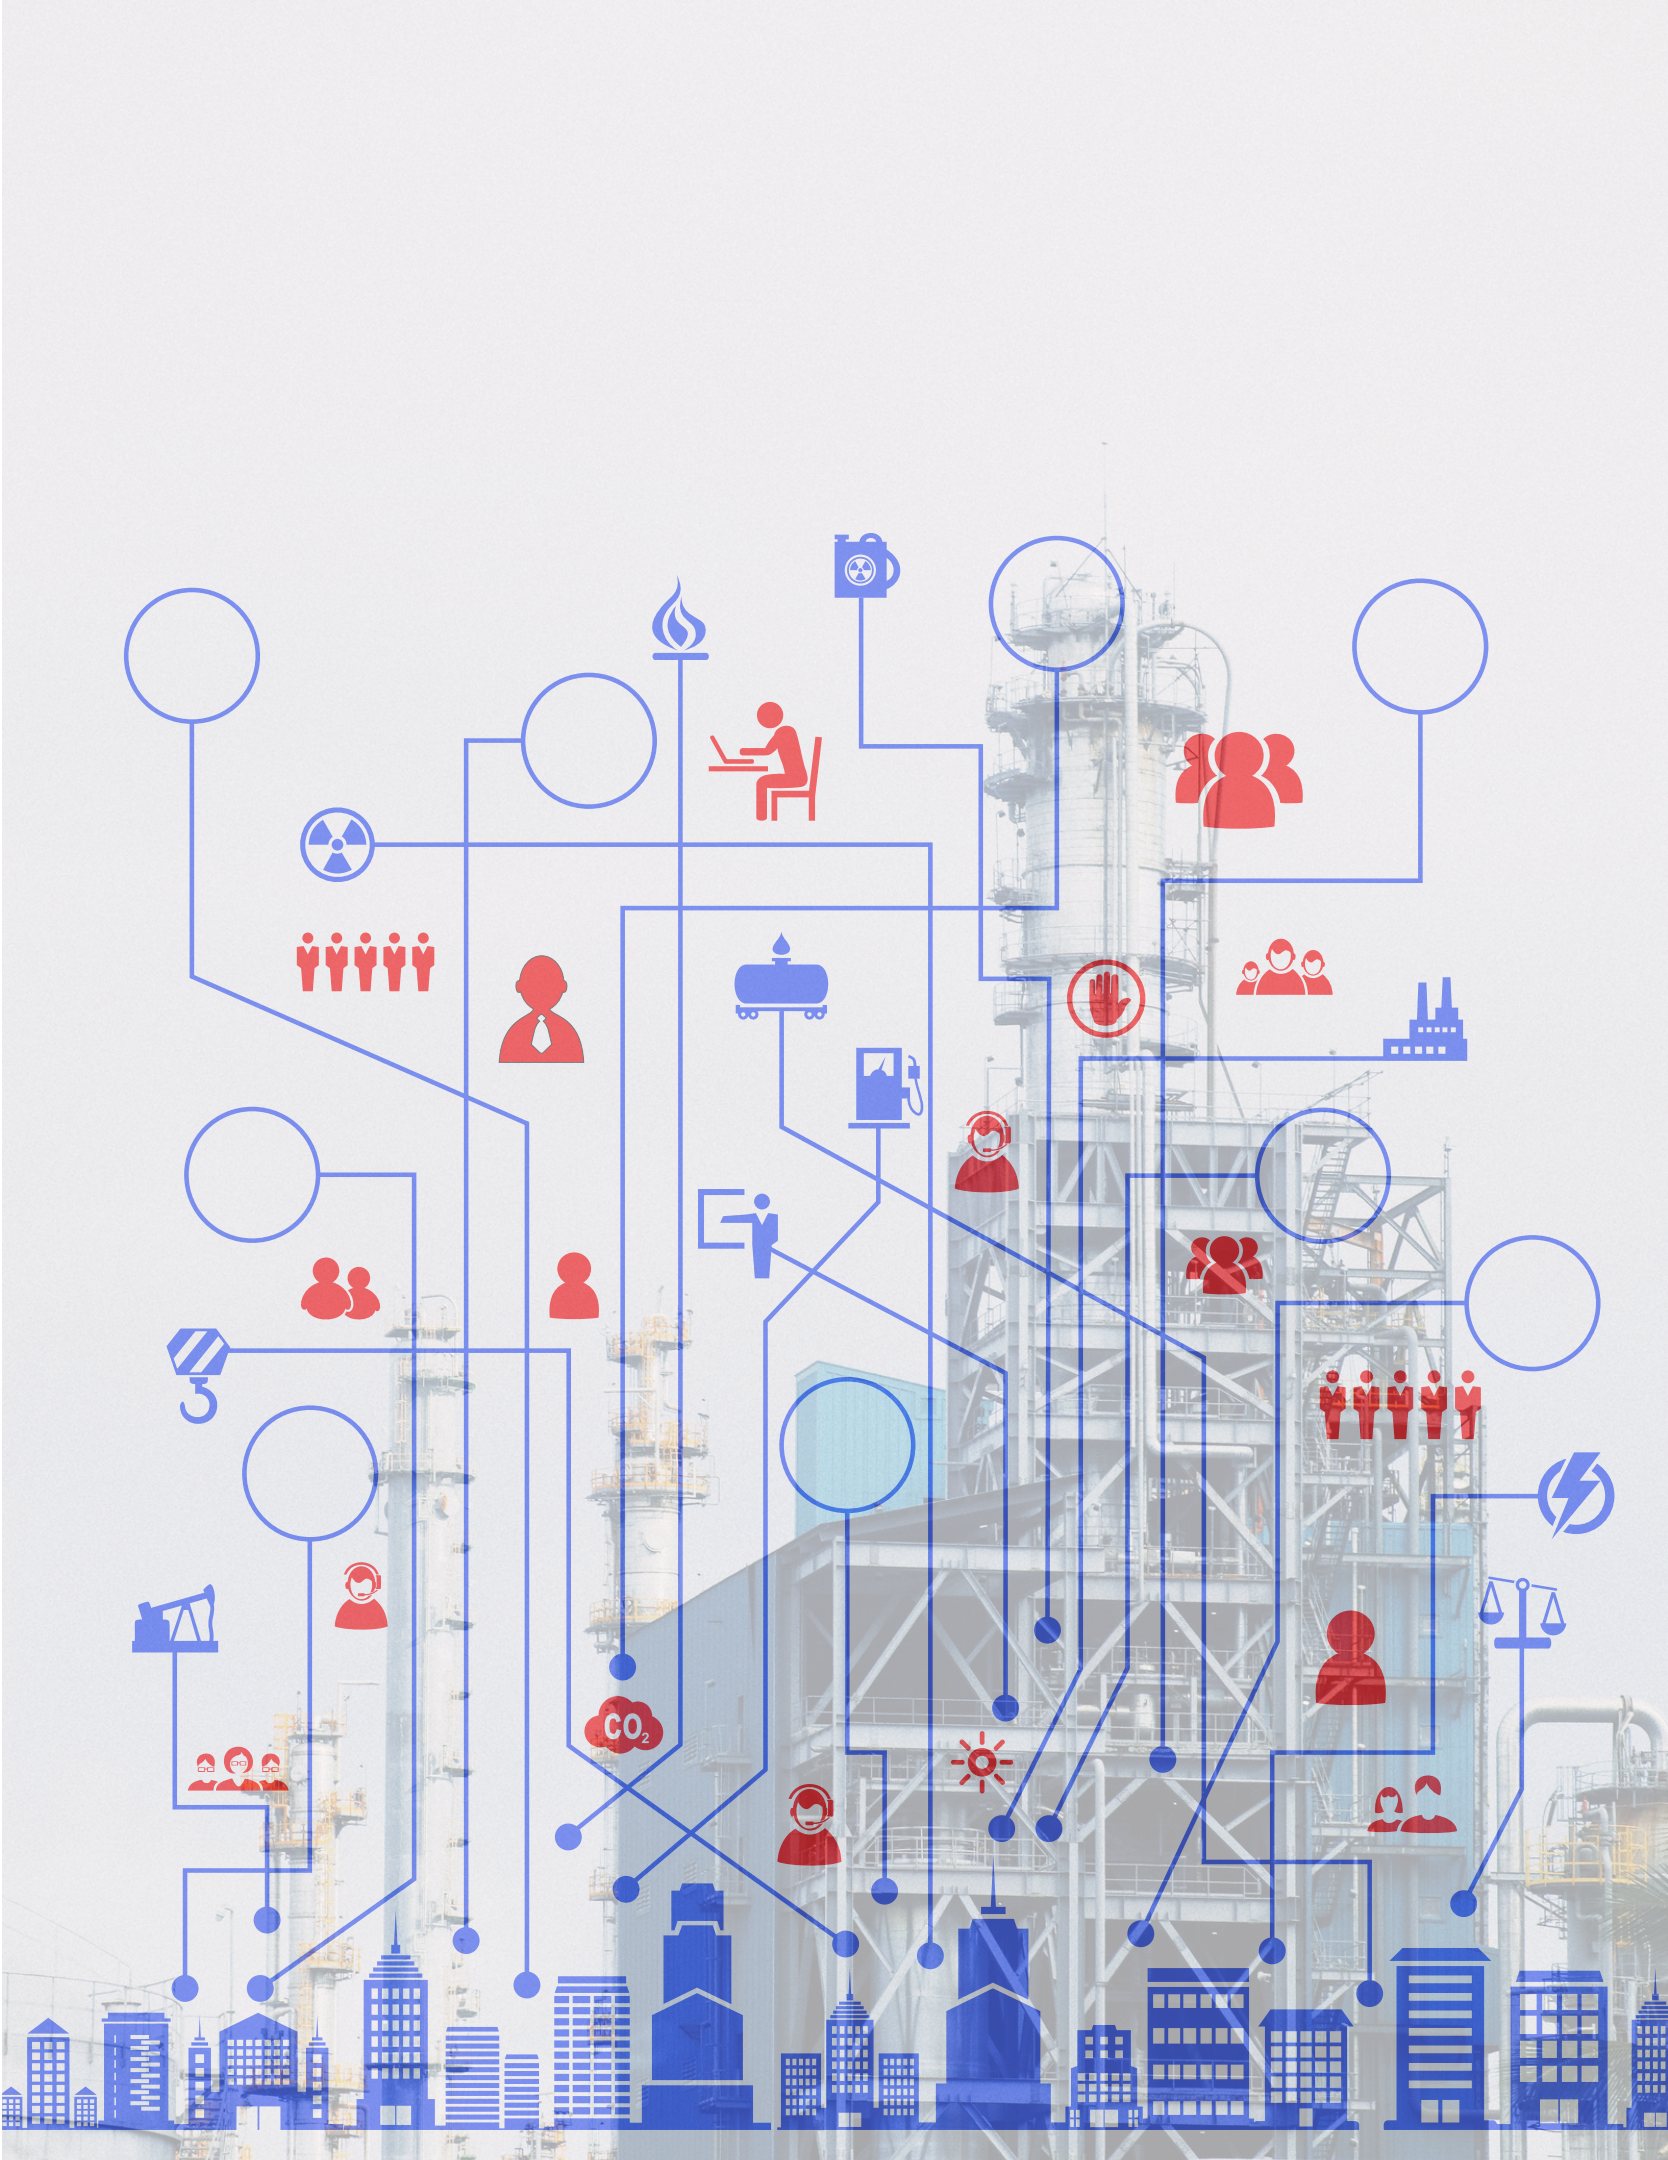

Employees:

Employees interact with a simplified yet powerful interface to manage their responsibilities. They can view assigned tasks, request deadline extensions, participate in task-specific chats, upload files, and track their personal performance. Task Manager empowers employees to stay focused, organized, and aligned with team objectives while enabling smooth collaboration.

Trusted Across Industries

One Tool. All Departments. Every Workflow.

AI-Enhanced Productivity

Drive Smarter Decisions, Faster

Task Manager integrates intelligent automation and data-driven insights to elevate team efficiency. Using AI, it helps spot workflow delays, track task performance, and reallocate resources in real time.

Smart Suggestions: Get task priority recommendations based on past behavior.

Performance Insights: Visual dashboards for individual & team KPIs.

Auto-Reminders & Escalations: Keep teams on track without manual follow-ups.

Workload Balancing: Detect under or over-assigned resources instantly.

Predictive Analytics: Forecast delays and proactively adjust timelines.
