

## Auto Inventory Forecasting For Business Central User Scenario Documentation

Auto Inventory Forecasting give you the ability to predict how much inventory you need to meet future sales demands by look at historical sales data and trends withing your Microsoft Dynamics 365 Business Central.

This document will cover the basic system set up required to run the forecasting app and how to run forecast within Business Central.

### Setting up Items for Forecasting

By default, items will be assigned a lookback period. This will set how far back the application will look back at your historic data to make its forecast. The lookback period can be adjusted per item.

First search and select an Item

Tell me what you want to do  

items

**On current page (Business Manager)**

-  **Sales Quote**  
Offer items or services to a customer.
-  **Sales Order**   
Create a new sales order for items or services.
-  **Sales Invoice**  
Create a new invoice for the sales of items or services. Invoice quantities cannot be p...

---

**Go to Pages and Tasks** Show all (30)

 **Items** Lists

Select an item and scroll to the Cost & Postings tab

In the lookback period set how far back you want the data to look back on. What you set will be the data used to determine your forecasts for the future.

Make sure the API URI and API KEY are installed in order to activate the AI. To get the keys see link below.

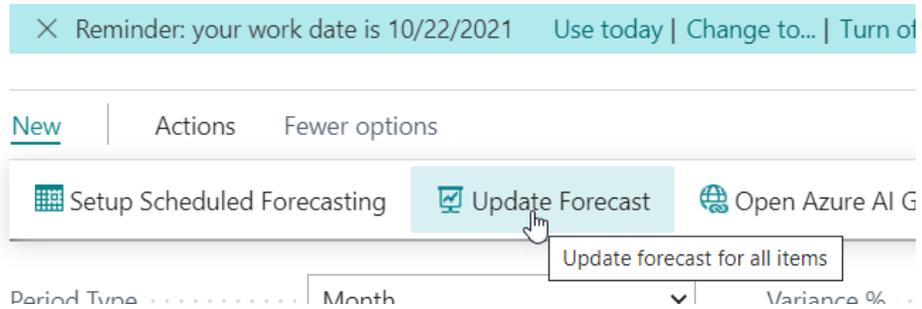

[Forecasting Model for Microsoft Dynamics 365 Business Central | Azure AI Gallery](#)

Enter filters and parameters for the AI forecast such as horizon, historical periods and timeseries model. For more information on timeseries model see above link.

Enable the “Use of Demand Forecast” in order to use the AI for demand forecast.

Run the AI forecast by selecting “New” then “Update Forecast”. This will allow the AI to run its calculations and store its results in Business Central.

# Sales and Inventory Forecast S

To view the AI results navigate back to Demand Forecast

Create a new forecast or re-use and old one.

Enter your parameters again like above and run the Forecast again. The results posted will be using the AI calculations.

Note: for the AI to have results there needs to be enough historic data in your system.
