Dynamics 365 Business Central Lanham E-Ship Implementation

AUTOMATE SHIPPING WITH LANHAM'S E-SHIP FOR DYNAMICS 365 BUSINESS CENTRAL

Customers today expect shipments to be tracked automatically, with notifications and tracking numbers delivered to their inbox. To meet those expectations and reduce the time-consuming manual shipping processes in your organization, **Lanham E-Ship** will automate shipping, receiving and notification processes for Dynamics 365 Business Central.

Your organization can have Lanham's shipping system up and running in just a few days with Western Computer's fixed-fee engagement. Applying expertise gained through more than 100 implementations, Western Computer's experts will implement Lanham's suite of shipping solutions, including:

E-Ship manages shipping of customer orders, vendor returns, and warehouse transfers. You can track items from shipping through delivery in each package, including multiple package orders.

E-Receive manages receiving of purchases, customer returns, and warehouse transfers. Warehouse employees scan barcode-labeled items or cases, automatically updating Dynamics 365 Business Central. E-Receive can also initial barcodes as items are received.

E-Mail automatically emails packing lists with tracking numbers to customers.
