'Where's Free?' prerequisites

Desktop and database
'Where's Free?' requires Microsoft supported, Cloud-based versions of the following products (NB on premise versions are feasible but subject to alternative commercial and support arrangements):

- Exchange Online/Exchange Server
- Outlook/Outlook Mobile
- Office/Office 365
- SQL Server

Browsers and Web Services:
'Where's Free?' runs with all vendor-supported versions of the following:

- IIS
- Edge
- Chrome (inc for iOS and Android)
- Safari (for iOS)

Operating systems (inc mobile)
'Where's Free?' runs with all vendor-supported versions of the following:

- Windows Server
- Android
- iOS
- Smartphones (minimum 4" screen)

Network
The Real Time Locating Systems or sensor subsystems use wireless and/or hard-wired signalling that does not impact customers' installed networks/LAN/WAN.
