

Optimize your hotdesking spaces with Whirla Smart Office

Friendly workspaces

The ability to book a desk eliminates the stress associated with the lack of an assigned work space, and prevents situations when users have no desks available.

Hot desks finally under control

The system registers data on the desk usage and allows for tracking the hotdesk occupancy rates. The analytics tool eliminates audits and saves time.

Higher efficiency = cost savings

Whirla hotdesk booking system will make the most out of your flexible office. Maximum overbooking rates will help you reduce office maintenance costs.
