Solution Summary

Wild Tech's '**Agentic Governance in a Box**' has specifically been designed to Help Organisations Tame AI Sprawl & Accelerate Innovation.

Agentic Governance in a Box is a Microsoft-aligned solution designed to help organisations take control of emerging AI development before it becomes a costly mess; as the enterprise adoption of generative AI accelerates, the risk of ungoverned agent development is becoming an urgent concern. Drawing lessons from the rapid spread of Power Platform apps in recent years, Wild Tech's new offering enables organisations to avoid duplication, reduce data exposure risks, and drive responsible AI innovation, right from the start.

*"Too often we see innovation outpace governance," Louwis Venter, Head of Microsoft Enterprise, said. "When the Power Platform was launched, teams raced ahead and built apps without structure or oversight. It was productive, but chaotic and expensive to fix. With AI, the risk is even higher. That's why we created **Agentic Governance in a Box**: a tangible, out-of-the-box framework that empowers teams to innovate safely, efficiently and with clarity."*

The solution is designed as a pre-configured engagement, priced for accessibility. It includes:

- A governance-ready agent development and evaluation workflow
- Embedded checks to eliminate redundant or overlapping AI agents
- Safe sandbox environments to isolate and test new agent ideas
- A centralised registry to ensure visibility, version control and appropriate access
- Templates for agent approval, documentation and onboarding
- Optional chatbot interfaces to facilitate idea capture and process automation

Rather than slow innovation, Wild Tech's governance solution facilitates it, removing bottlenecks and redundant builds, while ensuring all development aligns with business' objectives and security protocols.

Agentic Governance in a Box supports strong internal controls, secure information handling, and responsible AI usage practices that help reduce organisational risk, boosting the organisation's efforts in achieving cybersecurity best practice.

Solution Highlights

- Based on Microsoft Copilot, PowerApps, Azure integration services.
- Cost - \$10,000 Excl GST
- Time to value: ~2 Weeks

Key Benefits

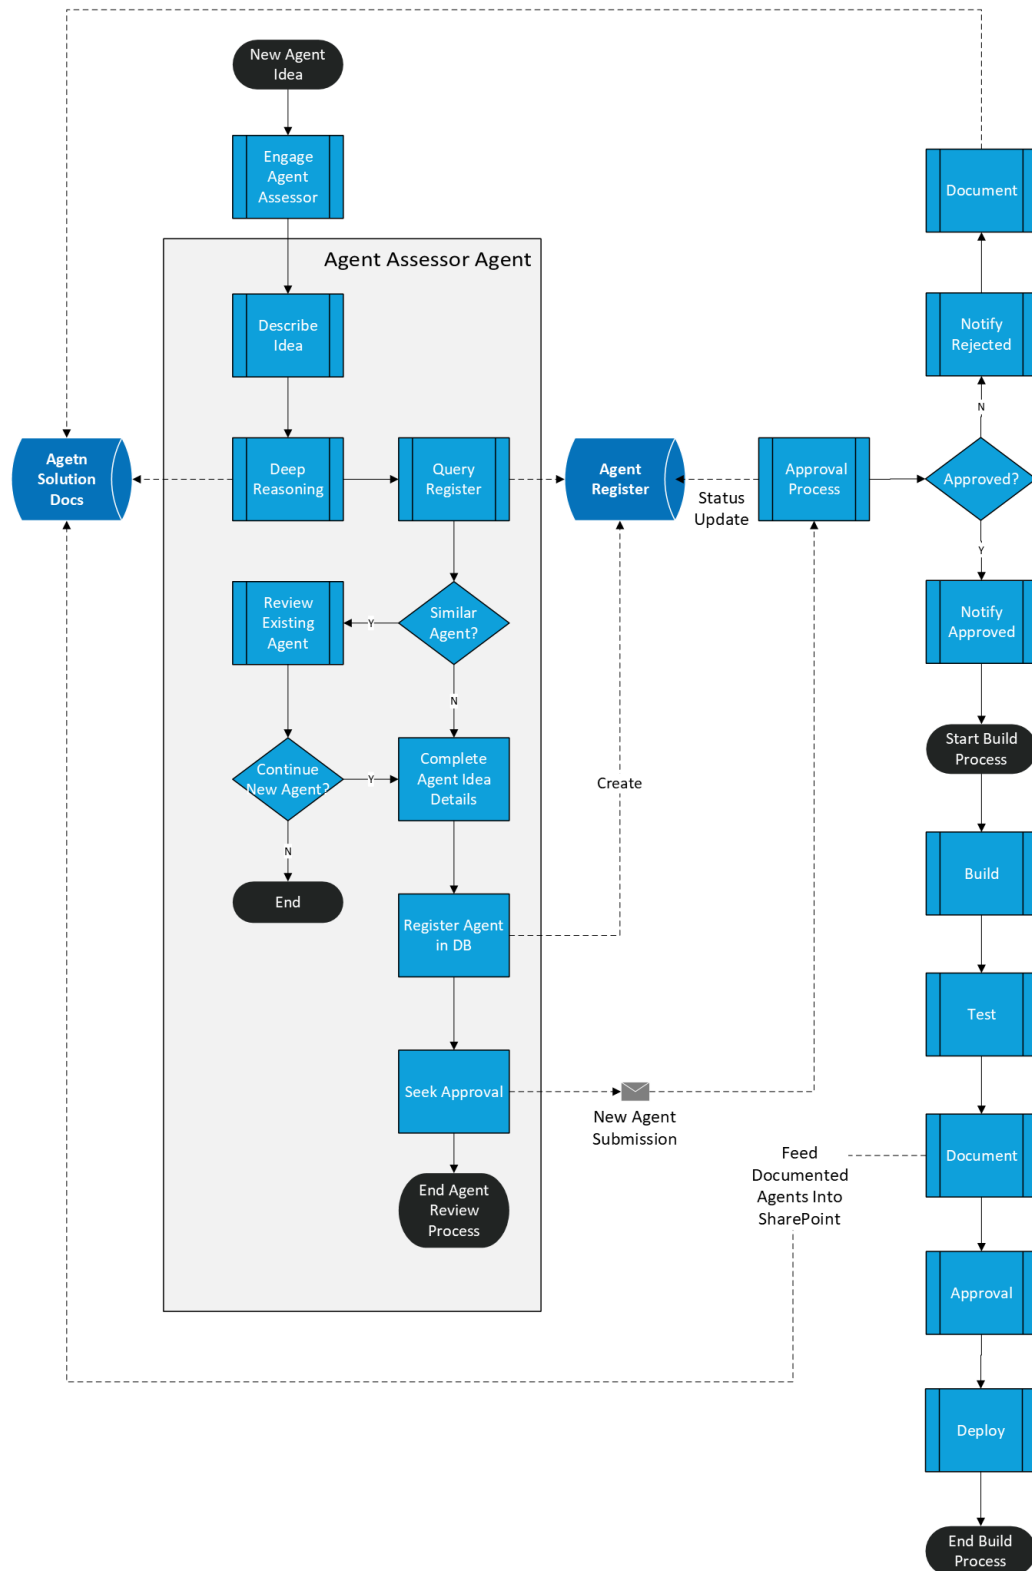

- Reduced Risk of User Security and Data Governance breaches.
- Reduced duplication of Agents
- Reduced Maintenance and Technical Debt

What's in the Box?

Visual Representation of the solution

The following diagram represents the solution outline and workflow:

Solution Deliverables

The following note the 'out-of-the-box' deliverables:

Deliverable	Description
A governance-ready agent development and evaluation workflow	A governance-ready agent development and evaluation workflow
Chatbot interfaces to facilitate idea capture and process automation	Chatbot interfaces to facilitate idea capture and process automation
Duplication Checks	Embedded checks to eliminate redundant or overlapping AI agents
Development Sandbox	Ensure/create a safe sandbox environment to isolate and test new agents
Agent Registry	A centralised registry to ensure visibility, version control and appropriate access
Approval Templates	Templates for agent approval, documentation and onboarding
Monitoring	Deploy the Copilot Control System (CCS) which is a suite of integrated tools and controls developed by Microsoft to help IT administrators and security professionals manage, secure, and monitor the use of Microsoft Copilot and AI agents across their organizations.
Solution Playback	A two-hour workshop whereby the solution is presented to the project sponsor.

Prerequisites

Wild-Tech will require the following to be in place PRIOR to the project commencement:

Requirement	Deliverable
Permissions	Wild Tech requires a user account with the correct licensing / access permissions to: • Create and Manage Environments (Power Platform Admin) • Build and manage CoPilot Agents in CoPilot Studio • Build and Manage Power Automate Flows (PowerApps Admin) • Ability to connect to Microsoft Graph API endpoints. • Access to manage M365 Outlook Calendar / Mailboxes for the groups identified.
Licenses	The following Licenses have been procured and reflecting on the tenancy: • Tenant level CoPilot Studio Licence • Minimum of 1 CoPilot Studio User Licence (for Creating Agents) • M365 CoPilot Licences for Users (Consuming / Using any Agents) <i>Notes:</i> • <i>Tenant level licence for CoPilot may not need to be procured due to existing Microsoft volume licensing eligibility.</i> • <i>M365 CoPilot Licences may not need to be procured due to existing volume licensing and eligibility.</i>
User License Assignments	The service account user will require the following license assignments:

Requirement	Deliverable
	• CoPilot Studio • Office 365 E3/E5 • Power Automate • PowerApps • Appropriate Microsoft Office Licenses
Environments	Sandbox and Production have been created

Option to Extend the Solution

The solution can be extended or modified at an additional cost. Any additional work will be done and charged at it at the rate indicated lower in this proposal. An estimate (in hours) will can be quoted on and will require approval, prior to the work being delivered.

Assumptions

- The project deliverables will be limited to a single organisation.
- Only a single point of approval has been catered for
- The client is responsible for the procurement of all software licenses
- The customer is responsible for populating the Agent Registry.
- Any of the following may result in additional charges as they are outside of Wild Tech's control:
 - a. delays in accessing the customers environment and/or data.
 - b. staff unavailability for workshops, training, and/or meetings

Commercial Offering

Solution Cost

The cost of the solution is **\$10,000** excl GST.

Enhancement Cost Hourly Rate

All enhancements requested and quoted for in the 2025 calendar year will be billed at **\$240/hour** Excl GST.

Billing and Payment Schedule

The '*Agentic Governance in a Box*' solution will be invoiced on or shortly after proposal acceptance. 14-day payment terms apply.

Any enhancement work will be invoiced at the end of the month in which it occurred with 14-day payment terms.

All invoices will be directed to the project sponsor unless otherwise specified.

Procurement Procedure and Commencement

You simply need to request an executable version of this contract noting the authorised signatory, accompanied by a Purchase Order with your billing information.

An executable contract will be sent via DocuSign. The Project can commence within two weeks of execution, and is usually completed within 1 week, based on your teams' availability.

Acceptance

EXECUTED as an agreement.
