WHO SHOULD ATTEND OUR WORKSHOP?

The stakeholders of an organization who own business processes in areas such as Customer Service, Finance, Marketing, and Generative AI Applications/Copilot, or those responsible for empowering the organization by automating business processes to enhance efficiency and achieve cost savings, are encouraged to attend this session.

WHAT PAIN POINTS DO WE ADDRESS?

1) Exploring Generative AI in Organizations: Many organizations struggle to understand the practical applications of Generative AI, unsure of where it fits into their business processes and how to leverage it effectively.

2) Change Management for Generative AI Adoption: Introducing Generative AI often meets resistance due to fear of job displacement, concerns about trust in AI decisions, or disruption of established workflows.

WHAT PAIN POINTS DO WE ADDRESS?

3) Leveraging Existing Cloud Infrastructure for Generative AI: Organizations may lack the cloud infrastructure needed to fully support Generative AI solutions, or they might be unsure how to integrate AI into their existing systems. This can result in inefficiencies and unexpected costs.

4) Generative AI in Action: Imagining a Day in the Life of Personas: While organizations may invest in Generative AI, employees often struggle to see its practical impact on their day-to-day tasks, leading to underutilization or misalignment with business goals.
