THE POTENTIAL OF MS FABRIC

7 Step Process
Set up – Connect – Transform
Report – Enhance – Validate – Share

Connectors
30+ Microsoft tools
100+ External tools

Security
Azure governance
Compliance

Consolidates Data

Gets you there faster

SPEED
30x

Normalize your data

Simplifies security

SAMPLE FABRIC USE CASES

Telecom
Customer Relations

Challenge
- Siloed data structure
- Access to real-time data

Solution
- Unified data
- Querying across environments

Integration facilitated:
- Real-time analytics
- Enabled better understand and respond to customer needs

IT
Finance

Challenge
- Analyze data from various tools and sources
- Costs control

Solution
- Ingest, transform, and analyze Data
- Azure tools to automate and provide financial insights

- Reduced costs with a flexible billing model
- Optimized their data processing with a single access point

Financial Services
Finance

Challenge
- Managing large amounts of data
- Different platforms and compliance
- Operational Cost

Solution
- Unified platform to manage: Data lakes and warehouses
- Leverage built-in tools for compliance, data security, and AI-driven insights.

- Streamline operations
- Reduce costs
- Improve decision-making processes
- Enabled advanced analytics and IA modeling
