WinWire

Modernize Your Applications to Achieve Better Business Outcomes

Organizations are mostly dependent on business applications to perform the core of their business. However, aging software, complex legacy applications, and the cost does not support the current business process and is imposing a significant challenge on organizations. Are your legacy applications holding you back and derailing your cloud strategy?

WinWire offers Application Modernization Assessment (AMA) services to help enterprises modernize their existing applications.

AMA services are enabling organizations to meet their current and future business objectives and empower them to meet organizational agility by leveraging the Cloud technology.
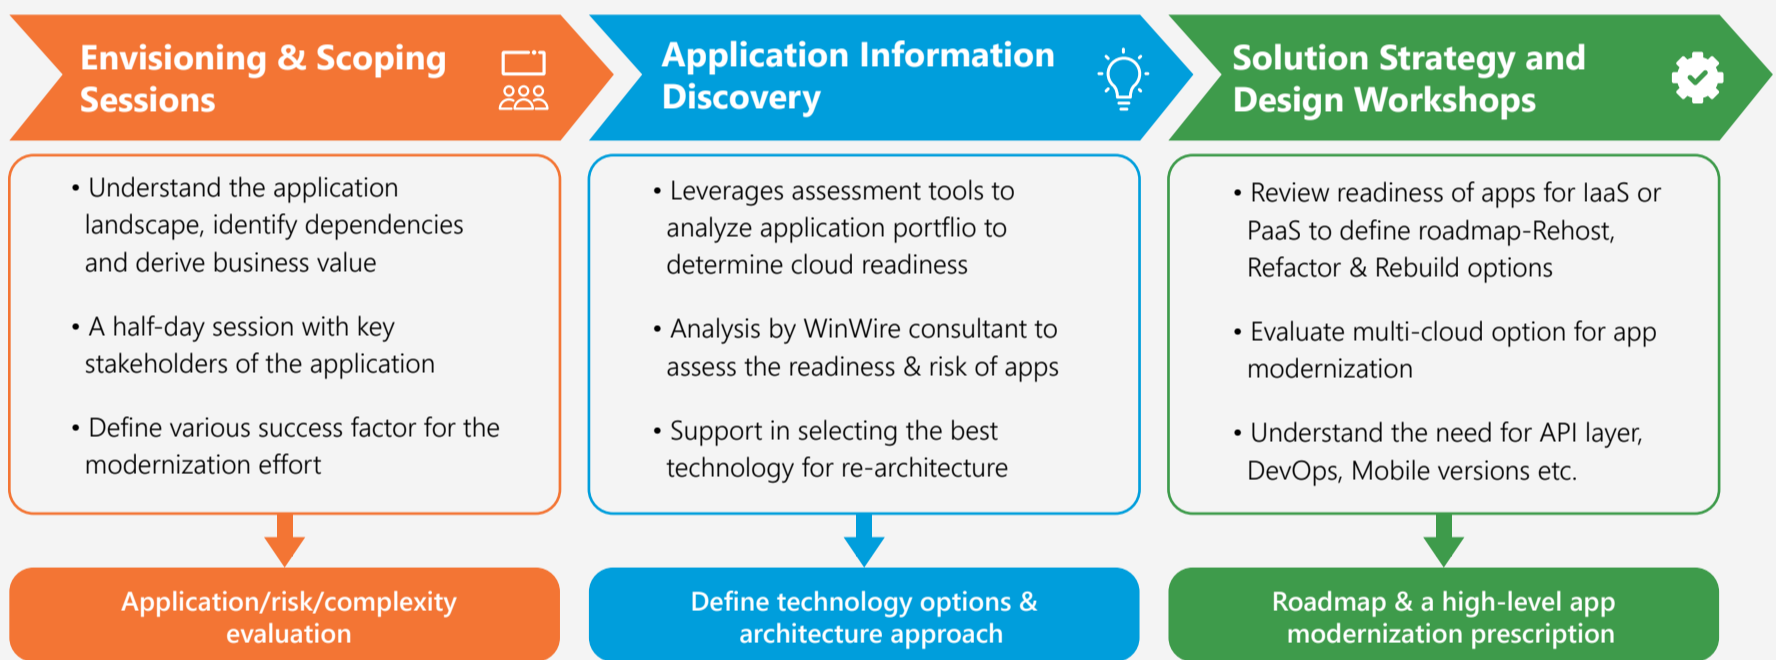

Customer Experience

World's largest healthcare accreditation firm significantly reduces accreditation time and uplifts business performance by 20% by leveraging WinWire's Application Modernization Assessment.

## WinWire's Application Modernization Assessment

WinWire provides a well-structured assessment of existing applications leveraging a three-pronged process as shown below:

Envisioning & Scoping Sessions	Application Information Discovery	Solution Strategy and Design Workshops
• Understand the application landscape, identify dependencies and derive business value • A half-day session with key stakeholders of the application • Define various success factor for the modernization effort	• Leverages assessment tools to analyze application portflio to determine cloud readiness • Analysis by WinWire consultant to assess the readiness & risk of apps • Support in selecting the best technology for re-architecture	• Review readiness of apps for IaaS or PaaS to define roadmap-Rehost, Refactor & Rebuild options • Evaluate multi-cloud option for app modernization • Understand the need for API layer, DevOps, Mobile versions etc.
Application/risk/complexity evaluation	Define technology options & architecture approach	Roadmap & a high-level app modernization prescription

Formulating and Modernizing a Migration Strategy

Our systematic approach assesses your current applications by understanding your business requirements and allows customers to optimize their business and their cloud investment.

WinWire can support you to take advantage of three migration options, that were evaluated out of the sessions, discovery, and workshops:

Migrate

Assess

Rehost - Redeploy application to a cloud platform without modifying its code

Refactor - Complete re-architecting of the app to suit the new cloud environment

Rebuild - Discard legacy application & develop again leveraging cloud services

Optimize

Why WinWire?

• 13 plus years of experience as a technology partner for Fortune 500 and Global 2000 organizations

• Expertise in digital technologies like Cloud, AI/ML, IoT, Mobility, Security, Microsoft 365, Dynamics 365 & UI/UX

• Recognized as Best Place to Work™
