

AZURE SYNAPSE ANALYTICS SERVICES

Limitless analytics service with
unmatched time to insight

The need to harness data for greater clarity and agility has never been more necessary as customer expectations heighten and our economy becomes more digitally driven.

WinWire, a Microsoft Azure Partner and Microsoft's Azure Synapse Analytics, brings together the unmatched scale and unification capabilities with real-time contextual intelligence to the world of big data. We provide end-to-end data services from advisory through engineering to intelligent data management solutions that leverage automation to manage and govern data.

Harness the Power of Data with Azure Synapse and WinWire

Our dedicated team of certified Azure Data and AI experts will ensure your organizations get the insights you need.

We deliver Azure Synapse Analytics solutions across industries to help our customers uncover the value from their data with cloud-scale analytics.

Our Offerings

Advisory

Enable blue-print and roadmap of Data driven digital transformation for clients leveraging the power of Azure Synapse

Modern Data Platform

Define your modernization path by leveraging & Data warehouse augmentation, automation, & optimization on Azure Synapse

Data Migration and Development

Ensure seamless development & accelerated migration life cycles for data warehouse ecosystems into Azure Synapse

BI Analytics

Dashboards and Reports with actionable insights to support business decisions from Azure Synapse

Unified Analytics

Unify and analyze data on streaming and aggregated data from your Data Lake and DW seamlessly using Azure Synapse Studio.

Advanced Analytics, ML & AI

Integrate & prepare multi-cloud & on-premises data for AI & ML use cases & operationalize them using our ML Ops framework

A few industry use cases that we are supporting with Azure Synapse

Data Driven Decision Science
Implement an enterprise-wide analytics platform to empower the decision makers with Descriptive and Prescriptive Analytics

Operational Analytics
Enable performance prediction and forecasting, what-if analysis

Fraud detection
Account and loyalty program protection and restrict fraudulence

IoT Data and Analytics
Facilitating high number of IoT devices need data analytics that predicts maintenance and optimizes assets, streamlines analytics and sensor data

Sales, Marketing and Customer Analytics
Predict buying behavior, risk and churn, enabling personalized recommendation and Next Best Action

Manufacturing Analytics
Improve manufacturing asset efficiency with Predictive maintenance, demand forecasting and inventory management

Why Azure Synapse with WinWire?

- Design Thinking based Business case and ROI development
- Metadata driven ingestion framework leveraging SQL, Spark, ADF services accelerating data engineering efforts
- Industry and function-specific analytical models, dashboards for Life Science, Retail, brings together the data model best practices and glossary definitions
- Tools for accelerating the data landscape analysis and conversion to Synapse

Benefits

Limitless scale, maximum impact

With WinWire + Azure Synapse, seamlessly unify your data across sources & systems to maximize accessibility while optimizing the performance of queries with intelligent workload management & limitless concurrency.

Get more value from your data

Leveraging AI and Power BI, uncover valuable insights that power intelligent actions and deliver real business impact – from improving customer engagement to optimizing operations.

Unmatched security

Have peace of mind that your data is safeguarded by industry-leading, automated security and privacy features like threat detection and always-on encryption to protect sensitive data in real time.

Strong Integration

Deeply integrates with Power BI and Azure Machine Learning to drive insights for all users, from data scientists coding with statistics to the business user with Power BI.

Customer story

A leading distributor of books to public libraries & schools uses Azure Synapse Analytics and Power BI to:

- Improve user experience and business performance
- Built reports through volumes of data for better data insights & rich reporting capabilities
- Reduced the time to load the report to 4 secs
