

Simplify and Accelerate Migration to Cloud with WinWire's Cloud Assessment Tool (WinCAT)

Enterprises are challenged to identify and categorize on-premise applications & assess their level of suitability before migrating to the cloud. However, because of this challenge, many migrations run into issues that interrupt a process and impacts business.

WinWire Technologies, a Microsoft Managed Partner offers Cloud Assessment Tool (WinCAT), that provides customers with a detailed assessment, and a data-driven business case to make the move to Azure Cloud for modernization of infrastructure and applications and enable customers to fast-track cloud adoption.

Streamline Cloud Adoption with WinCAT

WinCAT is an end-to-end cloud-enablement tool that accelerates your cloud journey and provides an organization with the clarity of vision and concrete steps required to successfully adopt cloud. Our pre-built accelerators and automated infrastructure helps to prepare for the migration and expedites execution and simplifies decision-making.

Discovers and Evaluates Applications

Understands Environment and Suggests Risk

Plans and Creates a Roadmap

Analyzes and Calculates TCO

Creates a Migration Plan and Migrates Assets

Once the assessment is complete, you will receive:

- Application Assessment Report
- Risks and Complexities
- Roadmap for Application Modernization
- Estimated TCO and ROI

Why WinWire?

- Strong focus on Microsoft Azure for the past 5+ years
- 65+ Certified Azure Developers
- Consistent & Proven Assessment Methodology
- Knowledge and Expertise from Several Projects Across Industries
