Modernize Your Data Estate with an Azure **Databricks MVP**

Modernizing your data estate gives your team trustworthy insights, streamlines operations, and enables faster data-driven decisions. But complexity—from scattered sources to outdated architectures—can slow you down.
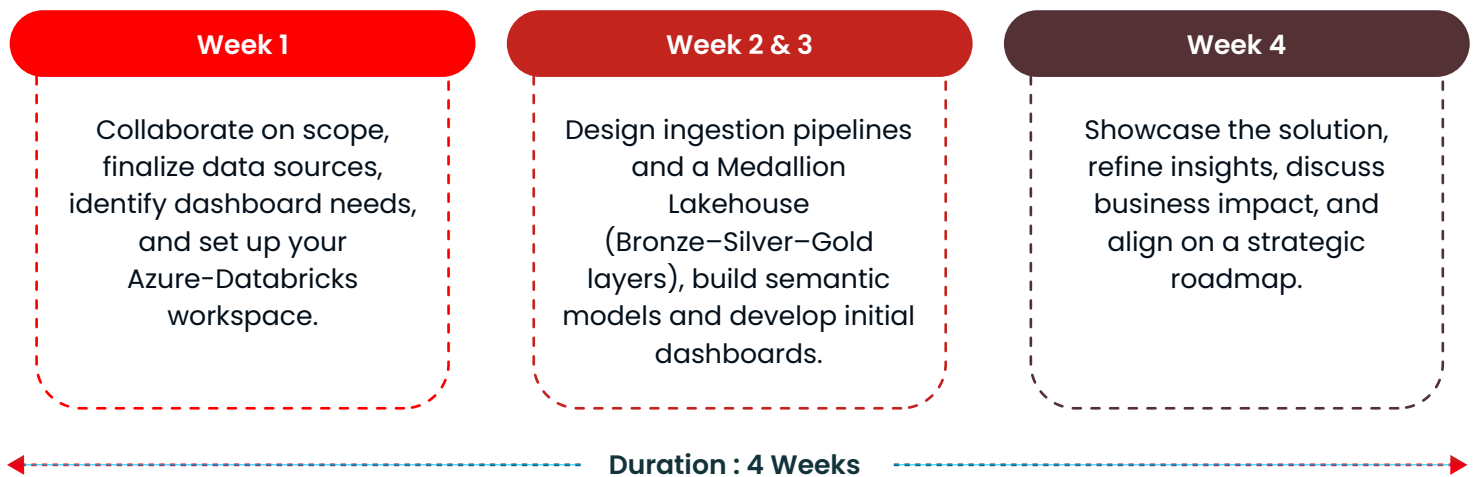

WinWire's Databricks MVP Offer - 4 Weeks

Envision jumpstarting your data modernization journey within a month—without the prolonged uncertainties.

WinWire's Azure Databricks MVP Offer provides a guided path to modern data architecture using the Medallion Lakehouse approach.

In just 4 weeks, we'll set up your Azure Databricks environment, ingest two targeted datasets, load historical data into the Lakehouse, build out two meaningful dashboards with their semantic models, and lay the blueprint for future growth—all on your Azure cloud tenant.

Execution Plan

Week 1	Week 2 & 3	Week 4
Collaborate on scope, finalize data sources, identify dashboard needs, and set up your Azure-Databricks workspace.	Design ingestion pipelines and a Medallion Lakehouse (Bronze–Silver–Gold layers), build semantic models and develop initial dashboards.	Showcase the solution, refine insights, discuss business impact, and align on a strategic roadmap.

← Duration : 4 Weeks →

Business Value

Faster insights
Accelerate time-to-value by quickly enabling faster data processing and analytics

Informed decision-making
Establish a single source of truth for reliable, consistent and trusted data-driven strategies.

Future-proof architecture
Build a scalable blueprint that fosters collaboration & enables self-service to a changing business landscape.

Ready to transform uncertainty into clarity?

Let's start a conversation—see how WinWire's Azure Databricks MVP Offer can quickly drive your data modernization journey.

We're here to help you turn complex data challenges into actionable insights—within just four weeks.
