AI-Powered Healthcare BOT to Combat **COVID–19**

The COVID-19 outbreak is causing a massive impact on people's lives, families, and communities. As the impact continues to grow across geographies quickly, we understand that healthcare organizations are facing several potentially significant challenges to which they need to respond rapidly.

Digital tools such as remote patient monitoring and AI-based Healthcare BOTS could play a vital role in containing the outbreak of COVID-19 and help citizens who think they've been exposed to COVID-19.

WinWire, a Microsoft Managed Partner has built a **Healthcare BOT** solution leveraging Microsoft BOT framework that will help healthcare organizations reduce the risk of spreading of the novel coronavirus.

WinWire's Healthcare BOT for COVID-19

WinWire's Healthcare BOT leveraged AI- based chatbot to answer questions about COVID-19 through a natural conversation experience. The BOT uses automated software programming with recommendations from the Centers for Disease Control and Prevention (CDC) and the World Health Organization (WHO) to provide accurate and updated information.
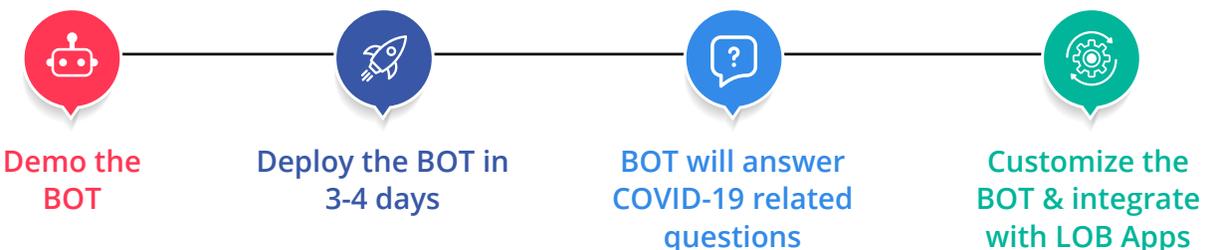

Our turnkey Healthcare BOT for COVID-19 will help organizations to:

- Provide answers to FAQs quickly and efficiently
- Support Q&A from the CDC and WHO websites
- Multi-lingual capability as BOT understand multiple languages
- Reduce tedious tasks and save efforts and time of caregivers
- Avoid further spread of COVID-19

About WinWire
