

Microsoft Fabric Adoption Services

4-week assessment

Unlock a new era of data-driven success with Microsoft Fabric & WinWire

Bringing together the data, analytics, and AI-ML services in a unified Software-as-a-Service (SaaS) framework can optimize storage & computing resources, ensuring scalability & high performance while having control over cost. However, embracing **Microsoft Fabric** requires meticulous deliberation & planning to avoid making hasty investment choices like any intricate migration process.

Jumpstart your Microsoft Fabric adoption with WinWire

WinWire is helping Microsoft Fabric based transformative data platform initiatives when:

Migrating from Azure
data platform & services

Upgrading from
Legacy systems

Starting **greenfield**
initiatives

Microsoft Fabric Service Offerings

Together with Microsoft, we are helping our customers harness the transformative power of data and AI with Microsoft Fabric. We have a cohesive suite of Microsoft Fabric offerings, experience, and commitments, to build the data foundations that power AI innovation.

Assessment: Readiness, business case, TCO, ROI, vision & roadmap, proof-of-value

Architecture: Scalability, reliability, tech stack integration, interoperability, pilot execution

ETL Modernization: ADF, Synapse pipelines or other ETLs into Fabric native ETL

Modernization and Migration: Data platform & integration

Insights: DW with SQL endpoint for Analytics access; Power BI Direct Lake; Deep Insights

Cost Optimization: Right sizing of Fabric SKU, storage, and network

Data Security and Governance

Accelerate Microsoft Fabric Adoption with WinWire

WinWire offers Microsoft Fabric-based data modernization and transformative initiatives aided by WinWire's accelerators **Win with Fabric** and **WinMaaS** to optimize cost saving for up to 30% right from the planning till the implementation.

Get Started with Microsoft Fabric

WinWire delivers a 4-week assessment to cover the following:

Analyze current environment

Plan MS Fabric adoption

Proof-of-value execution for demonstrating capabilities

Define scope & execution plan for enterprise-wide adoption

Risk identification & KPIs to measure success
