

Microsoft 365 Copilot Customization

3 Weeks Workshop

Create & deploy custom extensions for Microsoft 365 Copilot with WinWire

Finalist
2023 Microsoft Partner of the Year
Cloud Native App Development

Microsoft 365 Copilot emerges as a ground-breaking innovation, effectively harnessing the prowess of Generative AI and the ability to develop plugins for Copilot opens a world of possibilities for enhancing functionality for organizations.

However, deploying plugins for Copilot requires technical expertise, as well as an understanding of the Copilot stack and its performance requirements.

Maximizing the value of Microsoft 365 Copilot with WinWire

WinWire’s Microsoft 365 Copilot Customization Workshop will help you enhance the power of Microsoft 365 Copilot with custom connectors and plugins for your apps. Whether you want to add new features, improve user experience, or integrate with other platforms, we can help you design and build extensions that suit your needs.

Our team of Microsoft 365 experts can help you prioritize the most valuable use cases for your business and test the feasibility and quality of the extensions, before deploying them. The workshop will enable organizations to walk with numerous Microsoft 365 Copilot benefits, demonstrating its potential to make your business more efficient and productive.

Unleash the Full Potential of Microsoft 365 with WinWire’s Copilot Customization Approach
