

# Migrate Legacy BI tools to Microsoft Fabric – Power BI

Accelerate BI Transformation with 'Win With Power BI Accelerator'

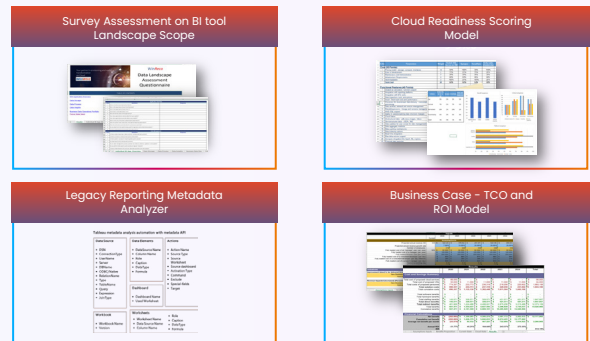

Organizations are moving from legacy BI tools like **Tableau, Qlik, SSRS, and SAP Business Objects** to modern solutions like Microsoft Power BI. Legacy systems struggle with complexity, costly maintenance, and hindered decision-making—impacting business growth. Microsoft is now transitioning Power BI Premium to Microsoft Fabric, retiring the P-SKUs.

Customers are encouraged to adopt Microsoft Fabric at renewal, gaining access to a unified platform that integrates data, analytics, and AI—offering seven distinct experiences in one service. This shift enhances data-driven decision-making and business agility through Microsoft Fabric's comprehensive features.

## WinWire Solution: Win With Power BI

WinWire's '**Win With Power BI**' accelerator enables enterprises to adopt the industry's best visual analytics experience on Microsoft Fabric – Power BI by seamlessly and rapidly migrating from existing BI / Reporting solutions, leveraging automation, toolsets, and frameworks. As a result, BI tool migration can be accelerated by 40% for faster time to insights.

### Key Benefits

**Future-Proofing:** Introduce AI & Gen AI capabilities to ensure adaptability and growth.

**Cost Savings:** Save up to **40%** on licensing and operational expenses by transitioning to a modern BI framework.

**Effort Reduction:** Achieve a **25–30%** reduction in dashboard build & conversion efforts.

**Accelerated Time-to-Value:** Reduce migration timelines by **25–50%** using metadata analysis and automation.

# WinWire's Approach for BI Tool Migration

**Model Migration**  
Seamless transfer of legacy semantic layers into Power BI using advanced automation tools.

**Governance & Optimization**  
Designing security & operational standards for scalable, integrated BI solutions.

**Pilot Execution**  
MVP delivery of converted dashboards to ensure immediate value realization.

**Environment Assessment**  
Comprehensive analysis of existing BI systems & inefficiencies.

**Report & Dashboard Modernization**  
Rebuilding intuitive, interactive dashboards aligned with user requirements.

## 4 Weeks MVP – Migrate Legacy BI Tools to Power BI

Our MVP assesses your existing BI landscape, paving the way for rationalization, optimization, and a seamless transition to a modernized Fabric-Power BI experience.

### Analysis

Assess the 4 reports / dashboards identified for MVP execution

Understand 1-2 semantic model, Data sources & Visualization UX for identified reports

Explore potential for consolidation/rationalization

Validate access to the technology environment

Initiate build for MVP

### Build & Test

Define Power BI standards and validate with client

Build semantic model in PBI

Define Visualization features using UX experience design

Build out reports / dashboards in Power BI

Leverage reconciliation tool to reconcile output of reports

### Demonstrate

Demo converted reports / dashboards

Feedback and updates

Knowledge transition

Discuss broader BI conversion plan

Roadmap

Duration : 4 Weeks

### Getting Started – Transform your BI landscape with ease:

Reimagine your BI future today. Let WinWire's Win with Power BI Accelerator guide your journey to a smarter, more agile analytics ecosystem.
