

Qlik to Power BI Migration Services

Accelerate Qlik to Power BI Migration and Save Up to 30% in Costs

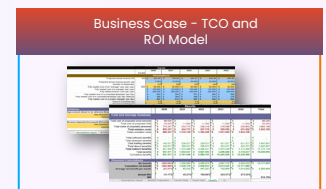

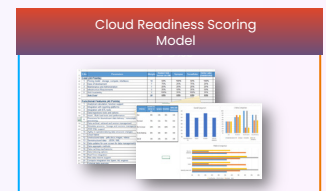

Migrating from Qlik to Power BI provides organizations with a robust, modern analytics environment with powerful visualizations and scalability that enhances collaboration, empowers users with intuitive, self-service analytics, delivers real-time insights, seamless data management, and a more cohesive business intelligence strategy.

Accelerate Qlik to Power BI Migration with WinWire

WinWire's 'Win With Power BI' accelerator for Qlik enables enterprises to adopt the industry's best visual analytics experience on Microsoft Fabric - Power BI by seamlessly and rapidly migrating from existing Qlik BI-Reporting solutions, leveraging automation, toolsets, and frameworks. As a result, BI tool migration can be accelerated by 40% for faster time to insights.

- Qlik App metadata, including QVW, QVF files, and QVD data sources, are extracted, stored in a database, and analyzed.
- Qlik features like Data Load Scripts, Associative Models, Apps, Sheets, Visualizations, and Set Analysis Expressions are key inputs for planning.
- The analysis determines the complexity, migration strategy, efforts, ROI & execution plan.
- The analysis helps model consolidation, reducing Power BI semantic layers & rebuilding costs significantly.

Business Value

Up to 25% reduction in semantic model rebuild efforts

Up to 30% reduction in report, dashboard conversion efforts

Metadata-driven accelerator for environment analysis

Productivity & faster insights with Copilot powered self-serving

Get started with Qlik to Power BI Migration

WinWire delivers a 4-week Qlik to Power BI MVP Migration Services

- Gain structured insights in the existing Qlik environment
- Build a business case and a TCO / ROI
- Migration, redesign and rebuild of Qlik assets
- Comprehensive migration roadmap

4 Weeks MVP - Migrate Qlik to Power BI

Our MVP assesses your existing Qlik landscape, paving the way for rationalization, optimization, and a seamless transition to a modernized Fabric-Power BI experience.

Analysis

Assess the 4 Qlik reports / dashboards identified for MVP execution

Understand 1-2 Qlik Associative Models, Data sources & Visualization UX for identified reports/dashboards

Explore potential for consolidation/rationalization

Validate access to the technology environment

Initiate build for MVP

Build & Test

Define Power BI standards & validate with client

Build semantic model in PBI

Define Visualization features using UX experience design

Build out reports / dashboards in Power BI

Leverage reconciliation tool to reconcile output of reports

Demonstrate

Demo converted reports / dashboards

Feedback and updates

Knowledge transition

Discuss broader BI conversion plan

Roadmap

Duration : 4 Weeks
