

As the world takes a deep breath and waits for the COVID-19 vaccine, state and local governments look for a robust and adaptive vaccine management solution that will expedite vaccine deployment securely and equitably at scale.

WinWire's Vaccine Management Solution enables health officials and providers to manage vaccine distribution, expedite vaccine administration, citizen registrations, and simplify monitoring. The solution provides real-time access to vaccine administration data to support decision-making and adapts as CDC guidelines evolve.

## Vaccine Management Solution

The mobile-ready solution is built on Microsoft Cloud for Healthcare & Power Platform. The solution provides rapid deployment, easy integration with EMR, & IIS, Patient enrollment, inventory management, and intelligent dashboards. It also automates back-end supply-chain clinical processes & enables patient service quality improvement using secure care data.

Our solution allows:

### Healthcare Providers

*Launch their vaccination program, enable vaccination appointments available to interested citizens, manage queues, prioritize healthcare workers and other frontline essential workers, and provide reporting on supply and demand.*

### Citizen Vaccine Planning

*Provides Vaccination Guidance, registration, self-service and pre-screening questionnaires to expedite appointments, track citizens' vaccination journey from registration to fixing an appointment to final vaccine administration.*

### Vaccine Program Learning

*Addresses FAQs via Bots, automated SMS and email reminders to drive citizen engagement, and conduct eligibility screening to reduce the contact-center overload.*

### Vaccine Distribution & Inventory Management

*Vaccine distribution, inventory management, and demand forecasting to meet the demand.*

### Quick Deployment

*Highly configurable and ready to deploy in 2-4 weeks assuming standard EMR/Calendar integration, with minimal training.*
