

## Wipro Data Intelligence Suite

One Stop solution for migration and transformation to cloud

# Wipro Data Intelligence Suite - Azure

Cloud Data Modernisation Platform is a set of AI/ML infused accelerators, enabling end to end automation of the cloud migration and transformation journey spanning across Azure.

Start with assessment of the on-premise platforms and make use of planner to plan and decide the migration strategy

Migrate Data Pipelines, Data Stores and BI Visualizations securely to cloud. Validate the migrations and build new Data Pipelines for the ongoing data loads

Monitor and operationalize on Cloud

## Business Applicability

Wipro Data Intelligence Suite complements Azure's cloud-native data services and automates cloud data transformations. Its out-of-the-box capabilities enable enterprises to innovate how they handle various tasks. Wipro Data Intelligence Suite takes care of end to end migration across data stores, data pipelines and Bi reports. It results in 30%-50% Migration Cost savings and Increase the productivity by 40-50%

## Success Stories

- Reduction of timeline and efforts by 30-40%
- 10% reduction in report inventory and automated report comparison
- 20% less in total cost of ownership and 60% reduction in development CUT effort
