

Insights Transformation with Wipro: 1 Hour Briefing

Wipro is a pioneer in the field of data and analytics and has been providing services in this space for more than 20 years. Our objective is to help organizations transform into **Intelligent Enterprises** leveraging trustworthy AI across business processes that are supported by actionable insights and powered by curated data.

Join us for a discussion on Wipro's offerings in Power BI and how we can help customers on their **insights transformation** journey.

This briefing session covers overview of Wipro's capabilities and solutions to accelerate insights transformation through our differentiated offerings across different geographies and domains.

The session helps customers get an understanding on -

- Modernizing their current insights landscape
- Moving to a cloud based environment for their consumption layer
- Managing a large self-service environment
- Augmenting their current processes with insights
