

Entra ID Onboarder Pack

Seamless Integration, Effortless Onboarding

Challenges

- **Understaffed IT Departments:** Many IT teams face resource constraints, leading to excessive workloads. The Entra ID Onboarder Pack can alleviate this by automating routine tasks, allowing staff to focus on more strategic initiatives.
- **Outdated Systems and Manual Processes:** Relying on old technologies or manual methods can be inefficient and error-prone. The Onboarder Pack introduces modern, automated processes that enhance accuracy and efficiency.
- **Remote or Hybrid Workforce:** The rise of remote work has introduced new challenges in device management and user onboarding. The Onboarder Pack ensures that remote employees have the necessary tools and access from day one, regardless of their location.
- **User Directory Security Concerns:** Unused accounts can pose significant security risks. The Onboarder Pack helps maintain a clean user directory by automating the deprovisioning of accounts, reducing the potential for security breaches.

Benefits

- **Streamlines IT Operations:** Reduces the burden on understaffed IT departments by automating user and device onboarding and offboarding.
- **Enhance Organization Productivity:** Reallocate IT resources towards enhancing business processes through technology.
- **Modernizes Management Processes:** Replaces outdated technologies (imaging) and manual procedures with cutting-edge automation, streamlining user and device management.
- **Supports Remote Workforce:** Ensures that remote employees receive devices that are pre-configured with the necessary applications from day one, facilitating a smooth start.

Withum Provides...

A service that brings a revolutionary approach with a comprehensive, automated solution for user and device lifecycle management, tailored for organizations of all sizes.

- | Planning | Implementation | Training |
|---|--|--|
| <ul style="list-style-type: none">• Evaluate Onboarding/Offboarding: Collaborate with IT and HR to assess current practices and identify areas for improvement.• Technology Assessment: Examine the technologies in use for deploying users and devices, and discuss any challenges faced.• Architectural Planning: Outline the technical framework for the Entra ID Onboarder Pack, tailored to your HR system, third-party apps, and OEM preferences.• Implementation Strategy: Develop a detailed plan to ensure a smooth and effective deployment of the Onboarder Pack. | <ul style="list-style-type: none">• Implement Entra ID SSO & User Provisioning: Integrate single-sign-on and automate provisioning with third-party apps for a seamless experience.• Customize HR System Integration: Ensure the Entra ID solution aligns with your company's policies by customizing the HR system integration.• Device Enrollment with OEM/Apple: Collaborate with your OEM or Apple to utilize Autopilot or Apple Business Manager for seamless device enrollment.• Intune Application Configuration for Device Deployment: Methodically configure apps in Intune and adopt a phased deployment strategy, progressing from Proof of Concept to Testing, and finally Production, using a meticulous white-glove method for new devices. | <ul style="list-style-type: none">• Technical Team Training: Provide comprehensive training to the technical team through interactive hands-on sessions complemented by detailed documentation to ensure a thorough understanding of the systems.• Administration Review: Thoroughly review all administration options and configurations to optimize system management and security. |

What You Get

- ✓ **HR System & Entra ID Integration:** Achieve seamless integration between your HR system and Entra ID to automate the creation and termination of employee accounts.
- ✓ **User Account Management:** Automate the provisioning and deprovisioning of user accounts, ensuring synchronization between Entra ID and third-party applications.
- ✓ **Intune Application Configuration:** Configure applications within Intune for distribution to new devices through Autopilot or Apple Business Manager (ABM).
- ✓ **Comprehensive Documentation:** Provide detailed documentation outlining the configuration processes and procedures.
- ✓ **Training Sessions:** Conduct one training session focused on the end-user process and another dedicated to the device deployment process.
