

Entra ID Onboarder Pack

Seamless Integration, Effortless Onboarding

Withum's Entra ID Onboarder Pack is revolutionizing IT efficiency with a comprehensive, automated solution for user and device lifecycle management, tailored for organizations of all size.

EMPOWERING YOUR ENTERPRISE

- ❖ **Automated User and Device Lifecycle Management:** Streamlines the entire lifecycle process from onboarding to offboarding, reducing manual IT tasks and increasing operational efficiency.
- ❖ **Seamless Integration with Cloud HR Systems:** Facilitates real-time synchronization with HR platforms, ensuring that user accounts and permissions are up-to-date and secure.
- ❖ **Comprehensive Support for Windows and Macs:** Offers a unified approach to device deployment and management, simplifying the setup process for IT teams and end-users alike.

Rapid time to value.

Automate to Innovate: Onboarding Simplified

The "Entra ID Onboarder Pack" simplifies IT operations with its automated integration and device management, making it ideal for both small and large organizations. It streamlines the onboarding process, from HR systems to identity providers and apps, and includes device management tools like Windows Autopilot and Apple Business Manager. This pack not only enhances IT efficiency but also supports business growth through technology.

Our offer features:

- ❖ **Integration with Over 20 HR Solutions:** Seamlessly connects Entra ID with a diverse range of HR systems, enhancing HR processes and data management.
- ❖ **User Lifecycle Management Across Platforms:** Bridges Entra ID with hundreds of SaaS and on-premises applications, ensuring smooth user lifecycle transitions.
- ❖ **Manual Account Creation Flexibility:** Allows IT to expedite account creation in Entra ID manually for specific accounts when necessary.
- ❖ **Advanced Device Deployment and Management:** Utilizes Windows Autopilot, Apple Business Manager, and Intune for efficient white-glove device deployment and secure remote wipes for departing users. This will remove your current device imaging process.

Withum Experience

When it comes to Microsoft 365 and Azure you need an experienced partner who has helped organizations safeguard their data and enhance compliance. Our tailored approach offers you a ready-to-implement package that is not only effective today but also scalable for your future business growth. Partner with us to ensure your data remains protected, compliant and aligned with industry best practices.
