

Great Plains to Microsoft Dynamics 365 Business Central Migration Readiness Assessment

Streamline your migration from Dynamics Great Plains to Business Central with a tailored roadmap that ensures a smooth, risk-managed transition.

For organizations considering migration from Dynamics Great Plains to Business Central, a Migration Readiness Assessment provides a clear roadmap to prepare for the transition. This engagement includes a thorough review of the current Great Plains environment, an analysis of cloud readiness and a tailored migration plan.

Our proven, step-by-step methodology for developing a migration roadmap:

The following page outlines the comprehensive details of our approach.

The goal of this engagement is to provide a comprehensive evaluation of your organization's current Dynamics Great Plains environment and determine the optimal path for migration to Business Central.

This assessment includes:

- + **Current System Audit:** Evaluate Dynamics Great Plains modules, customizations, integrations and data quality. Assess historical data needs and potential cleansing requirements.
- + **Readiness Evaluation:** Assess cloud readiness and system compatibility and identify technical or process gaps.
- + **Fit-Gap Analysis:** Mapping Great Plains workflows to Business Central's capabilities to identify improvements or required customizations.
- + **Migration Strategy:** A detailed plan with phased or full migration options, timelines and resource allocations
- + **Cost-Benefit Analysis:** Estimate of licensing, implementation, training, and ongoing costs with projected ROI.
- + **Migration Roadmap:** A detailed migration plan with milestones, risk mitigation strategies, testing protocols and post-migration support.

By the end of this engagement, you will have a clear migration roadmap, with identified opportunities for modernization, risk mitigation strategies, and a tailored plan that aligns with your business objectives.

Withum Experience

Withum has extensive experience in helping organizations modernize their systems, optimize processes, and ensure a smooth, efficient migration to Business Central.
