Okta to Azure AD (Entra ID) Migration Solution

Streamline Your Identity Management for Enhanced Security and Cost Reduction

Benefits

Our tailored Okta to Azure AD (Entra ID) Migration offering is designed to evaluate, plan, and migrate your current Azure AD investments, enabling you to achieve significant cost reduction, enhance end-user experiences and establish a robust foundation for implementing true identity security through a Zero Trust approach.

Approach

To ensure a successful migration and effectively manage associated risks, it's crucial to have a comprehensive understanding of your existing identity landscape.

Our team at Withum will work closely with you to assess the current state and identify the fundamental components required for a smooth transition from Okta to Azure AD.

We will develop a meticulous remediation plan and an initial migration strategy for your Okta applications, with the ultimate objective of seamlessly migrating them to Azure AD.

Scope

01
Single Sign-On (SSO): Simplify user access with seamless SSO capabilities for applications that support either a single Identity Provider (IdP) or multiple IdPs.

02
Lifecycle Management (LCM): Streamline user provisioning, deprovisioning, and identity lifecycle management processes for improved efficiency and governance.

03
Multi-Factor Authentication (MFA): Strengthen security by implementing multi-factor authentication mechanisms to protect against unauthorized access.

04
Conditional Access: Implement granular access controls based on specific conditions and policies, ensuring that users have the right level of access to the right resources at the right time.

Deliverables

1. **Current State Assessment of Identity and Access Management (IAM):** Gain a comprehensive understanding of your organization's IAM landscape, including an assessment of existing systems, processes and potential areas for improvement.

2. **Inventory and Analysis of Okta Applications:** Identify and evaluate all Okta applications within your environment, ensuring a clear understanding of their functionalities, dependencies and integration requirements.

3. **Migration Plan Development and Operations Sequencing:** Develop a detailed migration plan that outlines the necessary steps and sequence of operations for a seamless transition from Okta to Azure AD. This plan will ensure minimal disruption to your business operations during migration.

4. **Remediation Proposal and Migration Enablement:** Present a proposal for addressing any identified issues or gaps in your current identity management setup. This proposal will include actionable recommendations and strategies for a smooth and successful migration from Okta to Azure AD.
