Powered by the Microsoft Power Platform

199%
ROI over three years¹

\$1.41M worker
time savings over three
years
after applying a 50 percent
productivity capture¹

27.4% reduced
errors due to increased
automation¹

Leverage your investment in M365
and take full advantage of the automation tools you already have.

¹ Results are for a composite organization based on interviewed customers. The Total Economic Impact™ of Power Automate, a commissioned study conducted by Forrester Consulting, April 2020.

Break free from repetitive manual tasks

Make manual data entry a thing of the past

Whether you have legacy systems that can't talk to each other or circumstances that prevent you from moving some workloads to the cloud, desktop automation can enable a 'hands-off' approach to data entry. Fewer errors, faster data entry, and process standardization are just a few of the benefits.

Increase employee engagement

Your employees want to feel the work they are doing is meaningful and impactful. Freeing them up from boring, repetitive manual tasks and giving them other opportunities to learn and grow can lead to increased employee engagement.

Do more with less

If you find yourself with fewer staff to do the same amount of work, automation can help you bridge the gap. It's a guaranteed force-multiplier.

Rapid time to value.

Contact: Daniel Cohen-Dumani, DCohenDumani@Withum.com

A proven methodology of increasing business process efficiency through automation.

ENVISION

- Analyze current process pain points and tools.
- Facilitate cross-functional discussions to document ideal future state.
- Evaluate organizational readiness to automate key processes.
- Plan an implementation roadmap and establish success metrics.

ENACT

- Assist in the selection of two to three automation candidates.
- Create Desktop and Cloud automations for each.
- Deploy, test and train your staff to maintain the automations

EMPOWER

- Review Reporting for your Desktop and Cloud flows to determine health and usage.
- Assist in evaluating the ROI for deployed automations
- Plan for next steps based on automation roadmap

Add-on Services

- Power Platform Governance consulting
- Power Platform Center of Excellence installation and configuration
- Citizen Developer Program
- Power Platform license evaluation

Withum Experience

When it comes to automating with the Power Platform and ensuring adoption, you need an experienced partner. Withum has helped countless organizations successfully automate their processes, rapidly build business applications and transition to a highly adoptable, productive automated environment.
