Simplify your work. Boost productivity. Keep your data safe.

Try GPT Pro in Teams

Everything You Need, Perfectly Integrated

Maximum Productivity

Automate repetitive writing tasks, generate high-quality content, and optimize your daily workflow. All directly in your Teams environment, with a simple, intuitive experience.

★ Save up to 2 hours daily

Enterprise Security

Hosted in Europe on Microsoft Azure with GDPR-compliant data handling.

What GPT Pro Does for You

Smart summarization

Instantly condenses long threads into key points, decisions, and next steps for quick follow-up.

Writing assistance

Produces clear, professional replies or posts in the tone you choose (formal, friendly...). Edit and send in seconds.

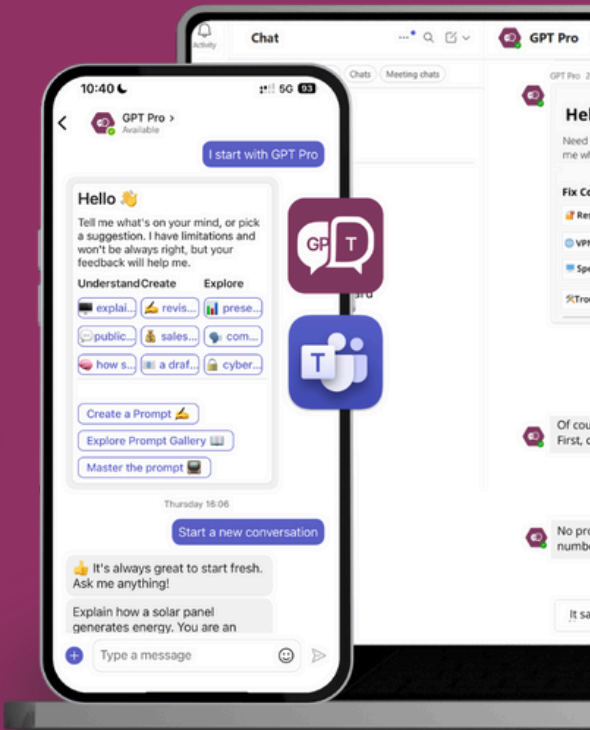

Instant translation

Translates drafts and messages while preserving meaning and style, great for global teams.

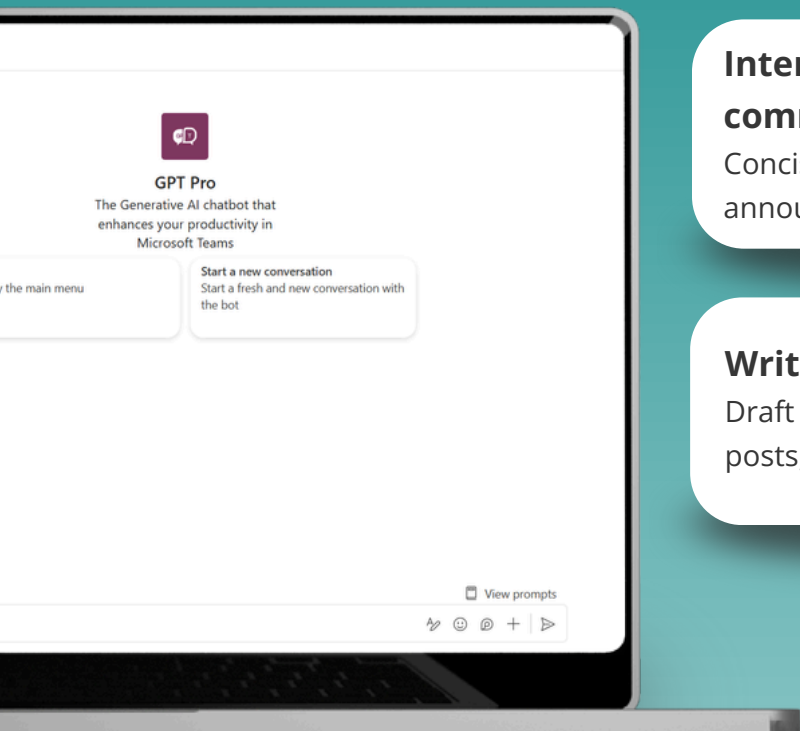

Assisted organization

Suggests how to classify or follow up (archive, prioritize, track).

Use Cases

Everyday tasks GPT Pro handles in Teams

Internal communications

Concise, audience-fit announcements.

Writing support

Draft emails, Teams posts, service notes.

Smart corrections

Fix spelling/grammar and improve clarity.

Meetings (text-only)

Propose agendas, talking points, summaries.

Translation

Remove language barriers across teams.

Who is it for?

Employees

Write better, faster; move from draft to done.

Teams

Align fast with shared summaries and messages.

Organizations

Scale everyday productivity with privacy by design.

How it works

- 1

Open Teams. Click GPT Pro.
- 2

Type your request.
