Deploy Microsoft Purview for Enhanced Data Governance

Microsoft Purview

Microsoft Purview is a powerful, cloud-based data governance platform designed to help enterprises manage their data efficiently and securely

Our implementation service aims to streamline the deployment of Microsoft Purview, ensuring that your organization can leverage its full capabilities to make informed decisions

Deployment Goals

- ✓ Rapid deployment of Microsoft Purview within your environment

- ✓ Establish a governance framework for configuring additional data sources, classifications, and glossary terms

- ✓ Onboard the initial set of business users
- ✓ Support the transition to production

Expected Outcomes

- ✓ Microsoft Purview set up with a foundational configuration

- ✓ Integration of up to twenty (20) cloud data sources and scheduling of initial scans

- ✓ Connection of Power BI, Azure Data Factory, and Office 365 sensitivity labels (if already in use)

- ✓ Implementation of content tagging and custom classification rules

- ✓ Comprehensive walkthrough and demonstration of Microsoft Purview's functionalities

- ✓ Summary of recommendations, lessons learned, and next steps

What We Will Deliver:

This service will enable your business users to fully utilize Microsoft Purview within your specific environment

Recognizing that each organization has unique needs, we offer customization options for additional data sources, advanced classification rules, availability considerations, and REST API integrations

Wizard Cyber's Data Journey Framework will guide you with a comprehensive set of recommendations for your data governance initiatives
