Connecting the dots
Digital transformation in Solar O&M industry

Integrate digital transformation solutions in processes, products and assets to improve efficiency, enhance customer value, manage risk, and uncover new opportunities to create revenue.

Documentation Management

Record, manage and store documents required for O&M, such as technical plant and equipment documentation and drawings, maintenance manuals, photos and reports, including the various versions that are being created by different users, reviews and approvals.

Contract Management

Manage maintenance contracts, improve equipment uptime and operation, fulfill contractual obligations such as reporting, cooperation, contract modifications, the interaction of the applicant, etc. Create peace of mind and customer satisfaction.

Personnel & Training Records

Record your employees' skills to identify gaps and to provide training in full accordance with respective national legal and professional requirements in order to fill the gaps.

Health & Safety Inspection Forms

Achieve a safe working environment by complying with the relevant legislations of your country and ensure that each of the field employees respects the health and safety legislation, strictly following the established procedures.

Warranty Management

Perform warranty-related works on site. Improve the efficiency in complaining processes, help to reduce the warranty period costs, receive and collect all the warranty complaint and support the complaint process.

Third-party Integration

Connect or integrate any third-party API applications. Export data to your ERP system. Link to your accounting system. Transfer information to project management software. Import data directly from machines and much more.

A maintenance management solution for Solar O&M based on Microsoft 365

Microsoft's 365 powerful cloud services and surrounding ecosystem, is comprised of a suite of business applications to support Solar O&M industry businesses across a range of procedures and lifecycles. An intelligent solution that drives digital transformation and works to empower your people to access all enterprise data from any device and enable continuous improvement.
