

Supercharge your cameras with
the Power of AI

What is Wobot.ai?

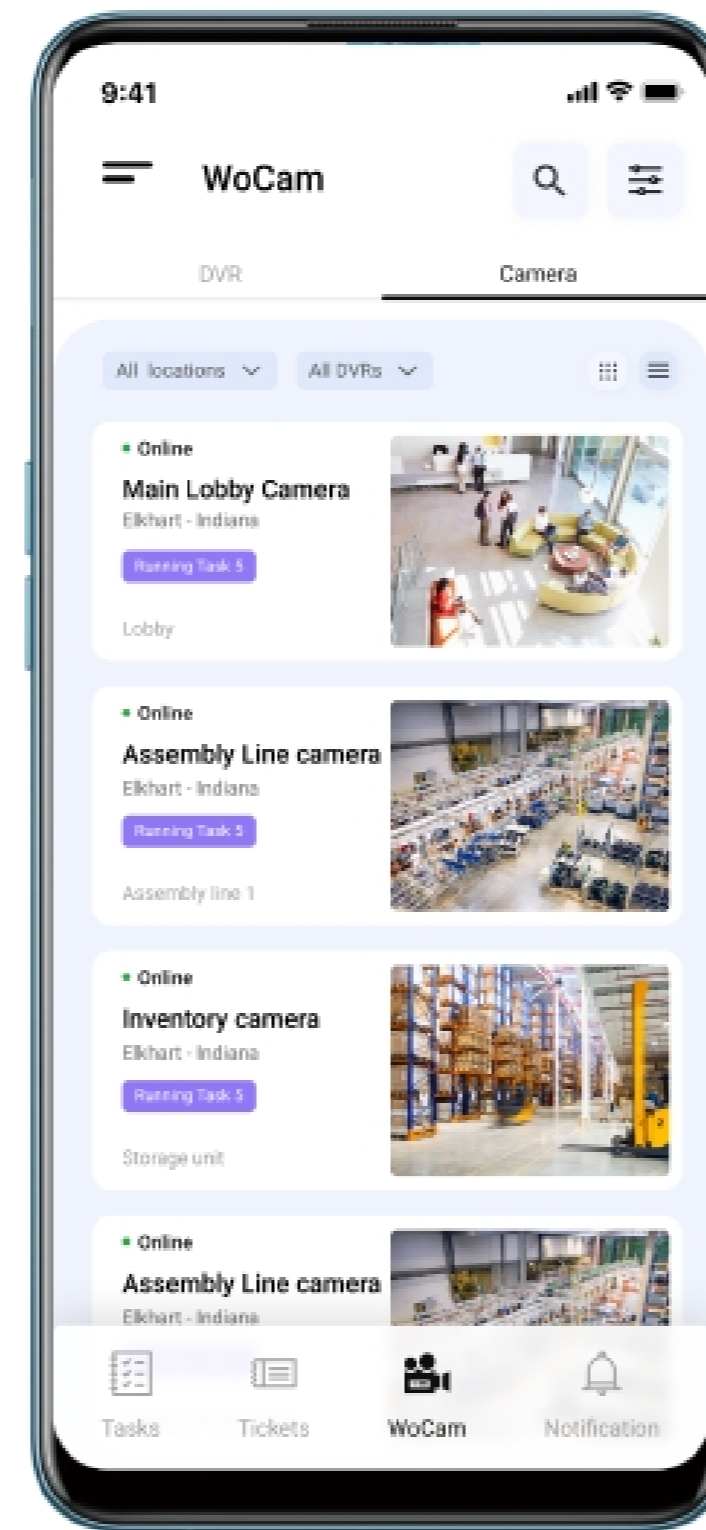

An Overview

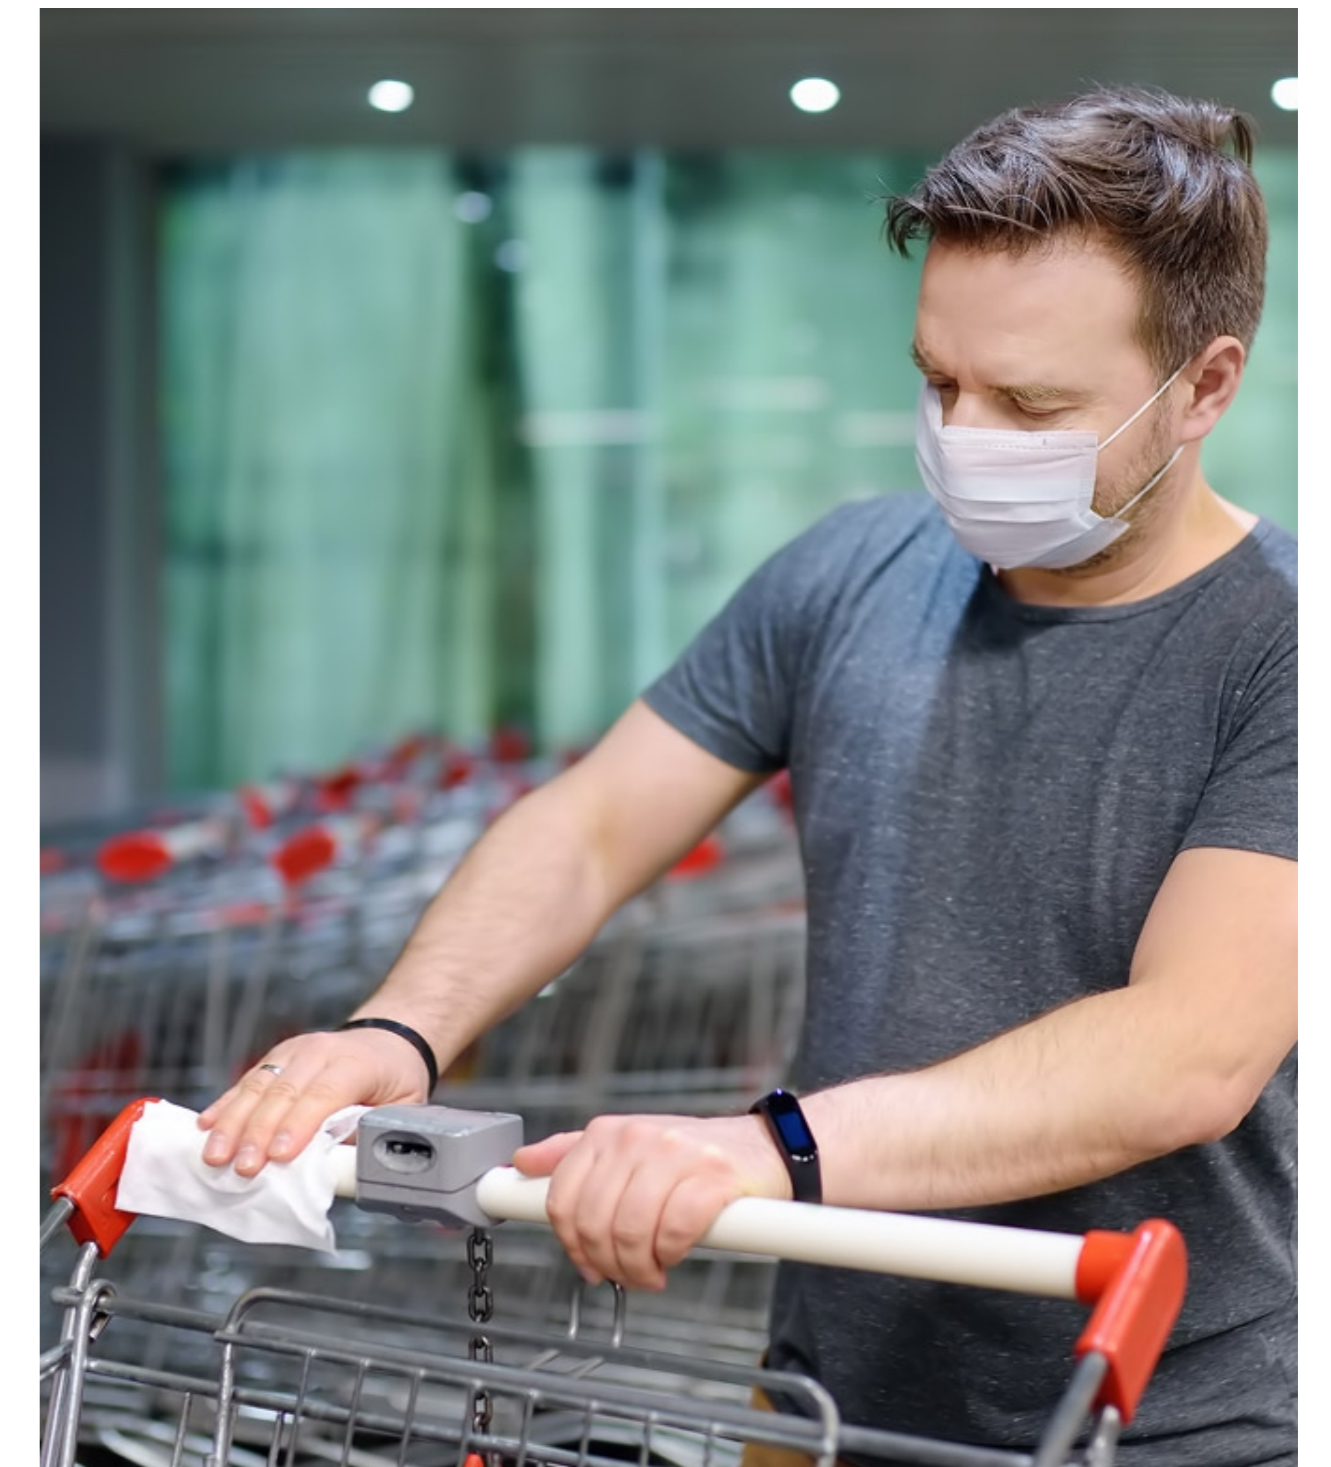

We believe that a synchronous combination of Humans in loop + AI is the future. We leveraged computer vision technology to build the stack that enables process compliance with a much needed feedback loop.

Easy Viewing

Remote Monitoring

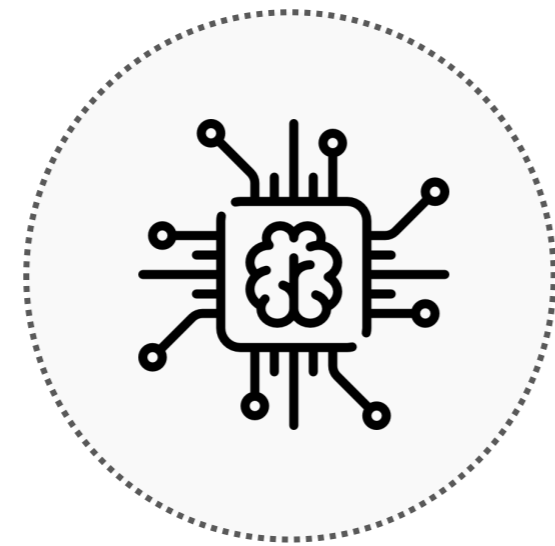

AI powered Process Compliance

An Overview

We enable automation of remote monitoring through the power of

Artificial Intelligence (CV)

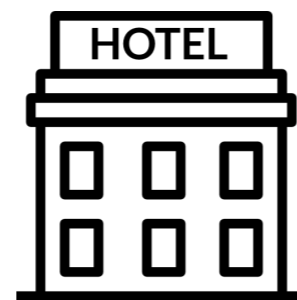

Checklists

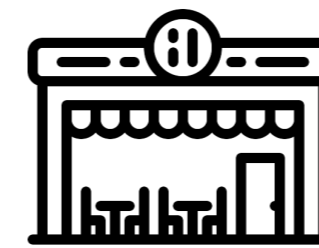

To deliver competitive advantage across various industries

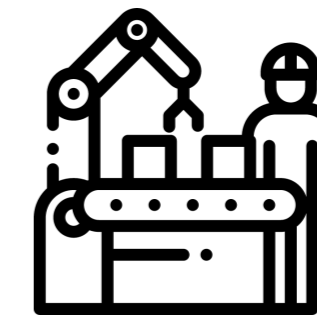

Retail +

Our Customers

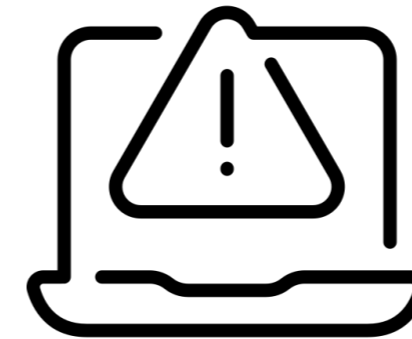

Wobot.ai Features

Manage all cameras across location with a web-based platform that's accessible from any browser. No configurations or plugins required.

Instant camera health updates. No missing feeds, no hardware, no capex. Pay as you go !

With workflows that notify users of relevant and actionable events, gain real-time insights without actively monitoring your system. Harness the power of AI, you would be surprised with what your camera can see.

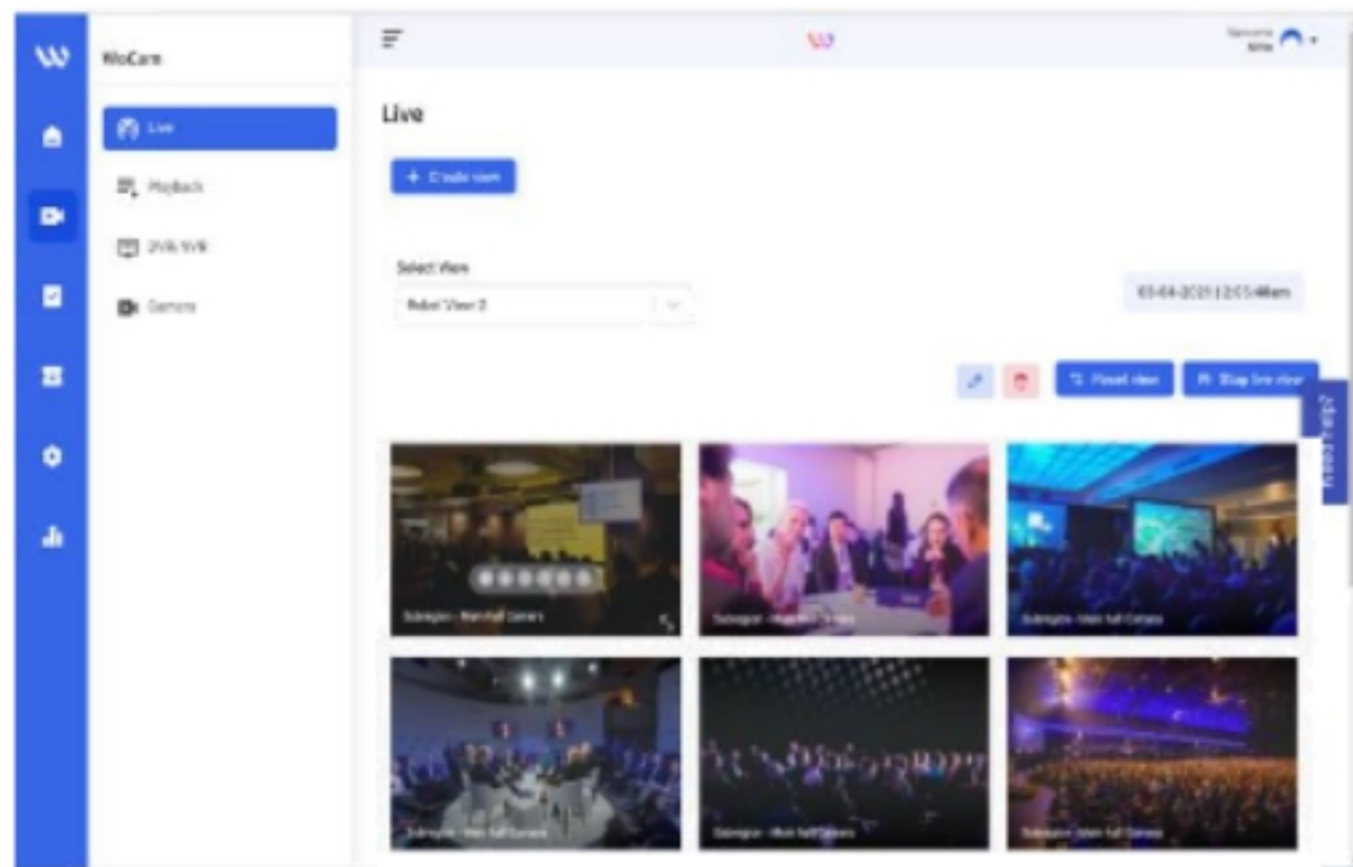

A powerful LMS ensures your teams embrace industry best practices & ensure proper execution against SOPs

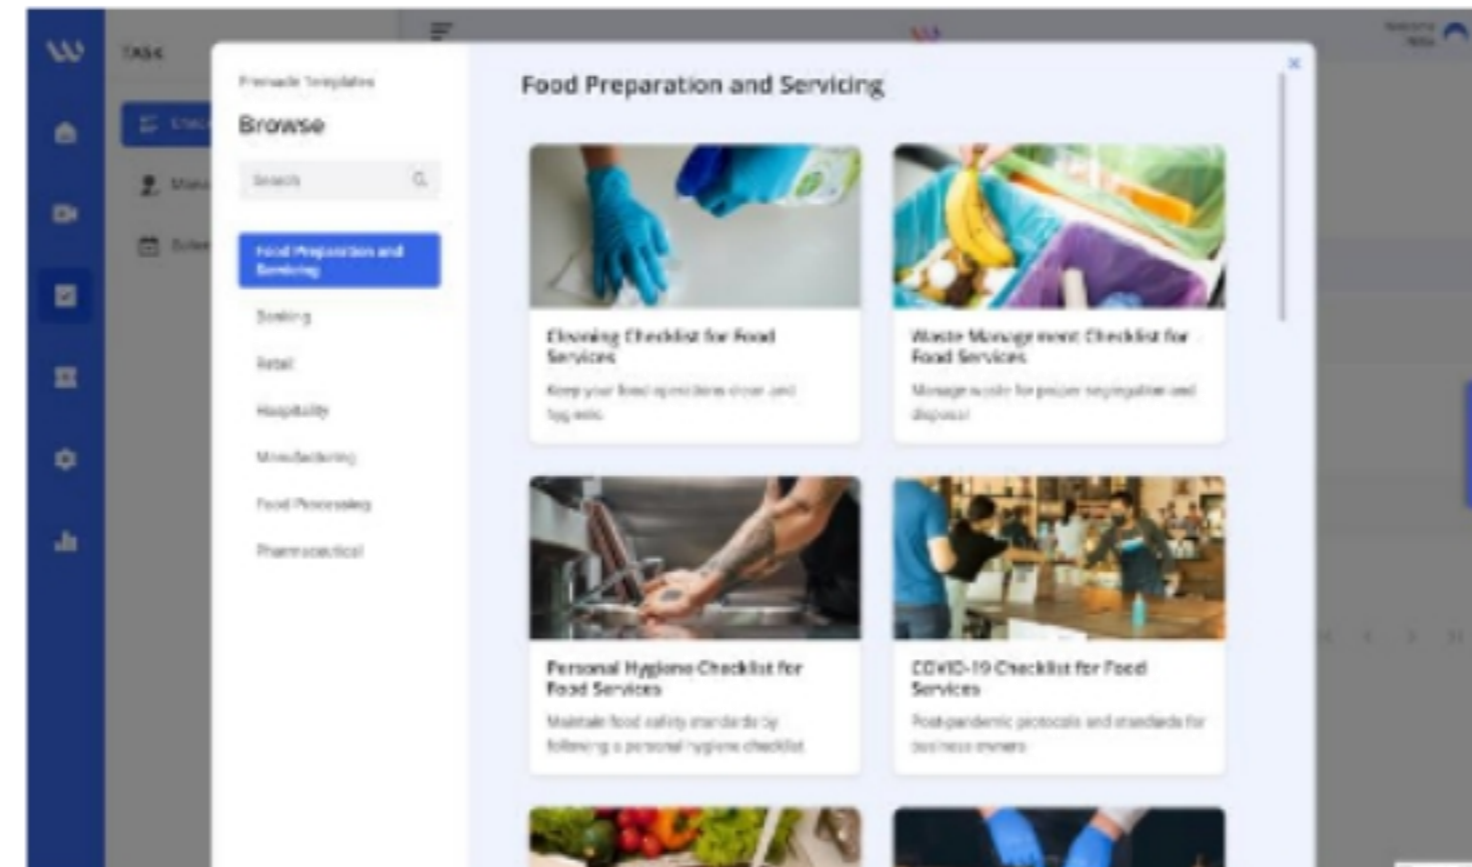

How does it work?

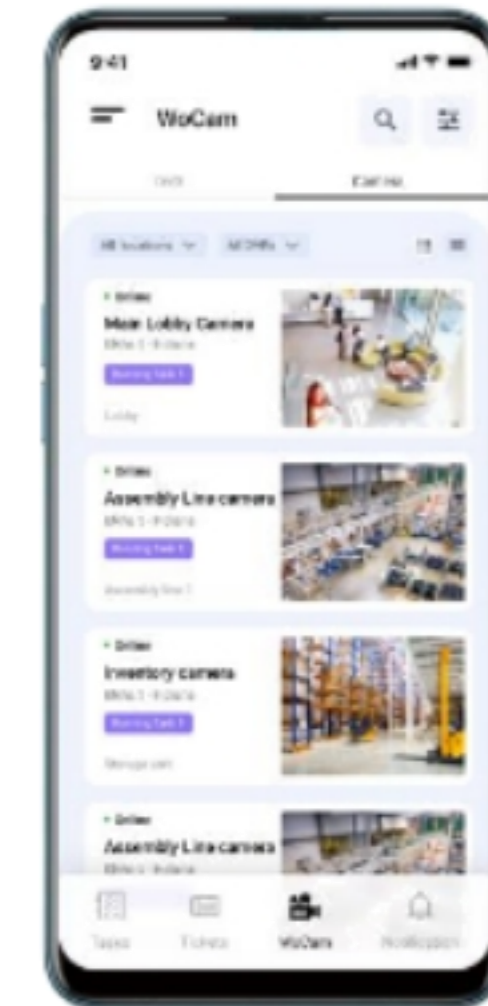

Onboard your Cameras and Instantly view them

Add AI Checklists for your cameras

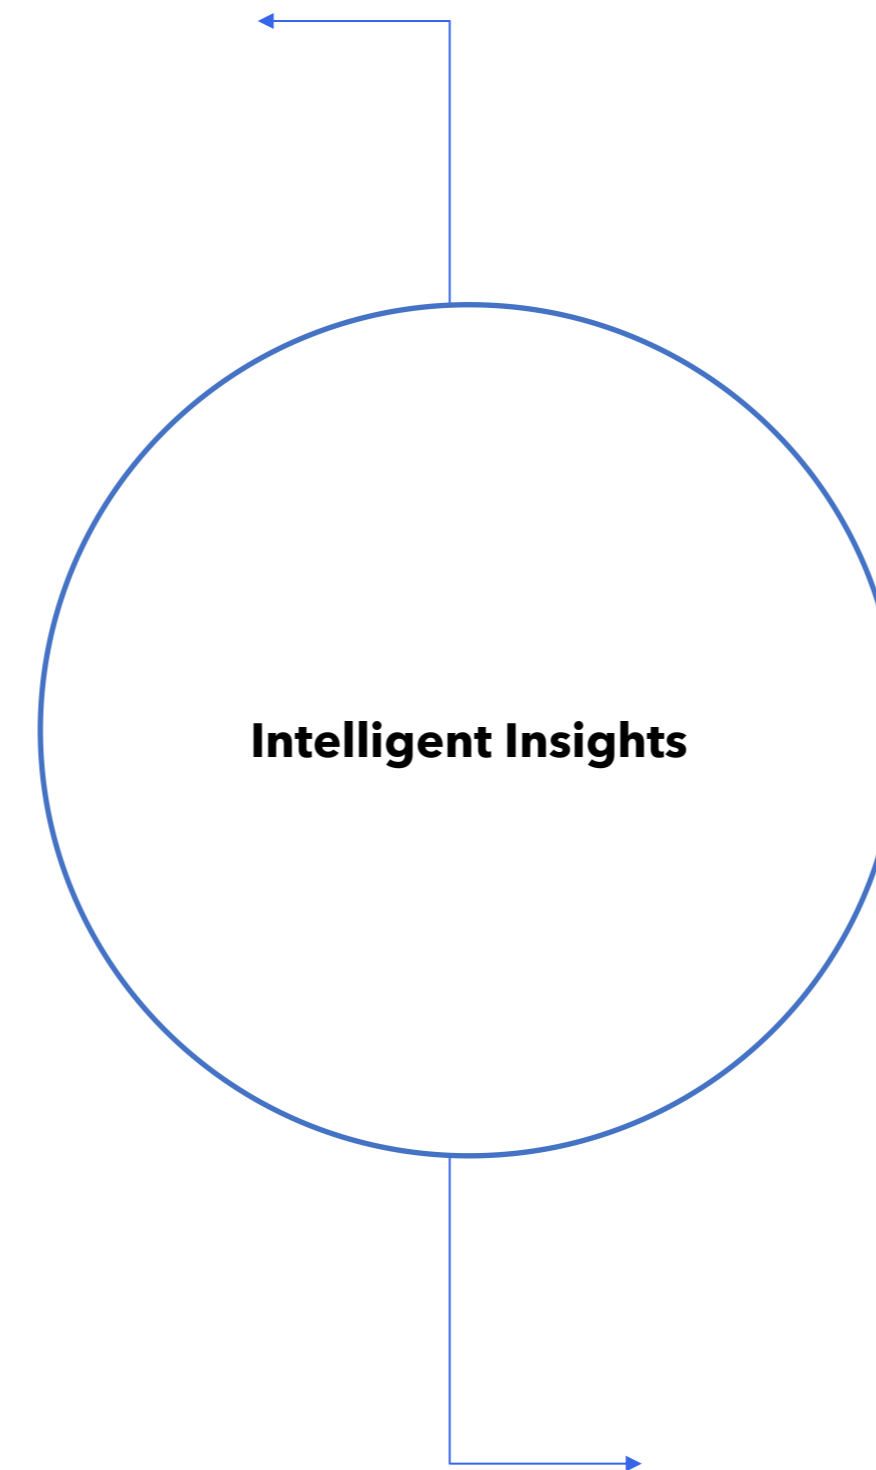

Sit back and watch relevant content

Qualitative Benefits
