

**Wonderful** allows enterprises to build, test and deploy best performing AI agents across their organizations. Our agents deliver natural, human-sounding service across phone, chat and email, in **native language**, with **24/7 availability** and **zero wait time**.

Wonderful combines a proprietary multilingual voice platform, full system integration and a world-class implementation team, ensuring every interaction feels personal and contextual. We work with leading enterprises in **10+ regions** across **all industries**, supporting **170K+ calls daily**. We focus on complex environments where others fall short, taking a hyper-local approach, creating the perfect customer experience.

Enterprises see measurable impact: **20% higher CSAT**, **50% shorter calls**, and **70% lower costs**.

-  **Local First**  
Hands-on and execution-driven, we build full local teams in every region to deliver localized service and fast integrations.
-  **Natural Conversation**  
Wonderful's system blends low latency, interruption handling, correct pronunciation, gender recognition, pace matching, sentiment detection and noise cancellation with respectful turn-taking and instant responses to create agents that feel natural.
-  **Action, not just words**  
Our agents connect with booking engines, CRMs, billing systems and internal tools to take action and resolve issues.

**Nir David**  
CEO at Bezeq\*

*"Wonderful was the only AI solution that met our bar. I was amazed by how naturally their agent handled our most complex flows across multiple systems."*

\*Bezeq is Israel's leading ISP, with 2000+ customer support agents, 3M+ customers and 10M+ incoming calls/year.
